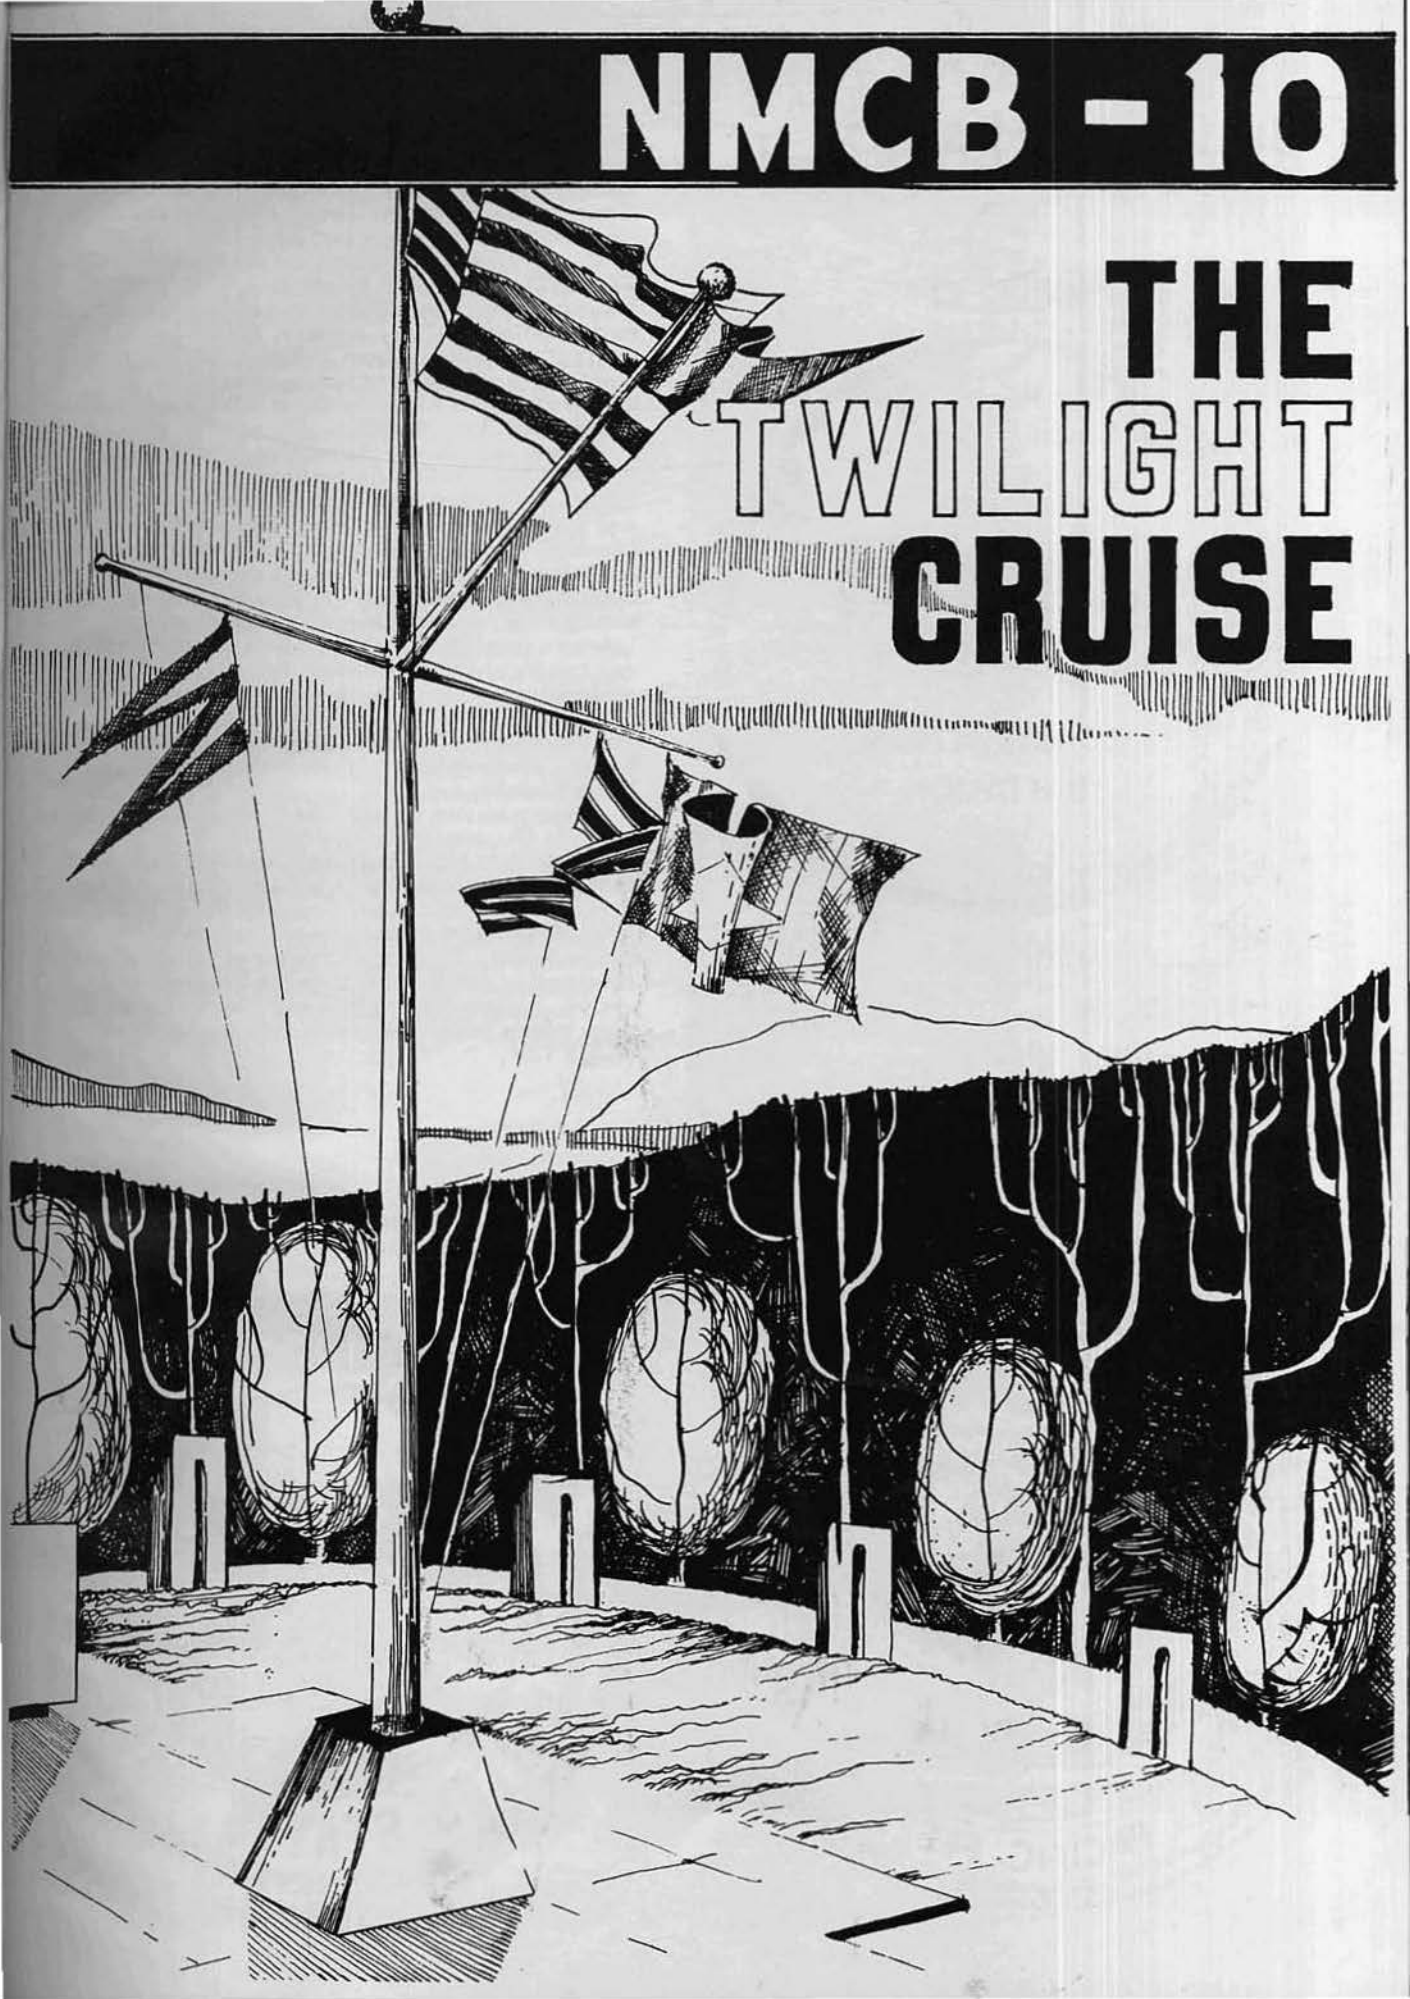
NMCB-10

THE TWILIGHT CRUISE



Battalion History

NMCB 103
1943-1952

NMCB 10
1952-1976

U. S. Naval Mobile Construction Battalion Ten was commissioned on 15 October 1943 as the 103rd Naval Mobile Construction Battalion at what was then Camp Perry, Virginia. The 103rd deployed to war-torn Guam during World War II, and thereafter remained on Guam to repair and build facilities there. On 2 October 1952, the name of the 103rd was changed to NMCB TEN. TEN remained on Guam until 1959, and then became mobile, homeported at the Naval Construction Battalion Center, Port Hueneme, Calif.

During the period from 1960 to 1965, the battalion deployed to various construction sites in the Pacific Ocean area from Alaska to Guam, Okinawa, and the Republic of the Philippines.

Spring of 1965 and the heating up of the Vietnam War found NMCB TEN deployed to Okinawa as the Pacific Fleet Alert Battalion. On May 7, NMCB TEN and the III Marine Amphibious Force went over the beach at Chu Lai, Vietnam, in the first amphibious landing subsequent to the Second World War. The battalion deployed to the Vietnam theater four additional times, earning thirteen campaign stars and being awarded two Meritorious Unit Commendations and two Navy Unit Commendations for exemplary performance at Danang, Quang Tri, Phong Dien Gia Le, and Chu Lai. The battalion's detail at Khe Sanh was awarded the Presidential Unit Citation for its part in the historic defense of that northern outpost of South Vietnam.

Recent history has seen the "Men of Ten" deployed again to Okinawa as the Pacific Fleet Alert Battalion, with details in Hawaii, Japan, and the Philippines; to Rota, Spain with details in Italy, Sicily, Scotland, Greece, Crete, Morocco, Germany and a large contingent of the British Indian Ocean Territory island of Diego Garcia. This record number of widely dispersed construction details brought to the forefront the innovative, modern construction and personnel management system which has become the trademark of NMCB TEN.

Battalion History

It was on this deployment that NMCB TEN picked up the nickname of the "M & M" Battalion. This appellation was first heard from a person observing the brightly colored hard hats of the various details and noting a similarity between the many colors and a certain candy by that name.

Because of its many widely dispersed details throughout the past several deployments, the battalion has created a new interpretation for the "M & M" nick name: Mobility and Management. Not unlike the well-known advertisement for Sherwin-Williams paint, NMCB TEN has spread itself thin-but it covers the world.

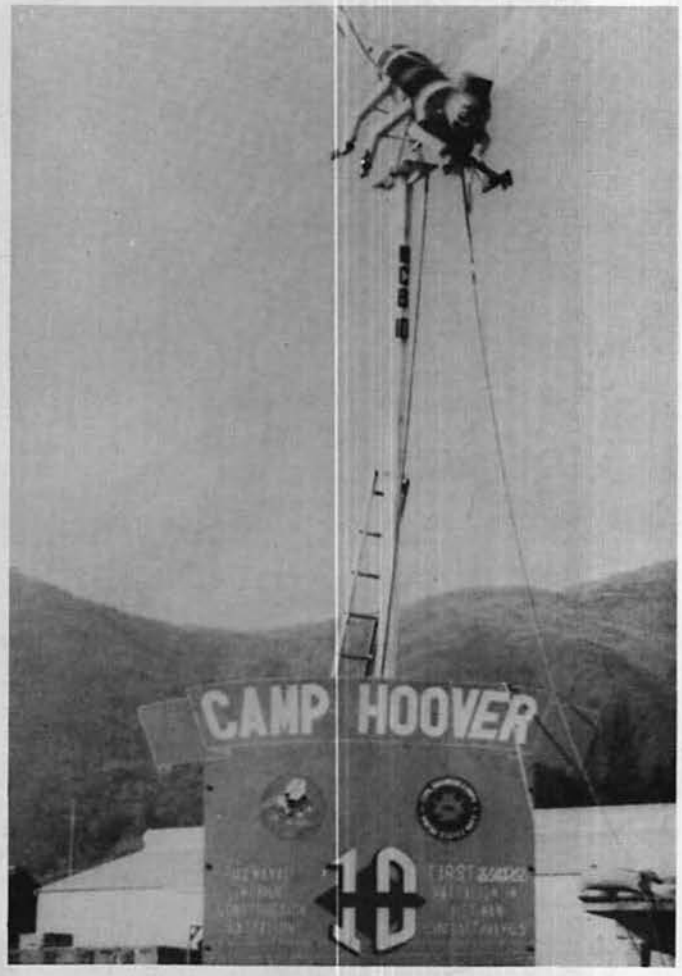
On January 7, 1974, the Men of TEN returned from their deployment to the Bahamas and Andros. This deployment also included a 180-man detail on the island of Diego Garcia, British Indian Ocean Territory.

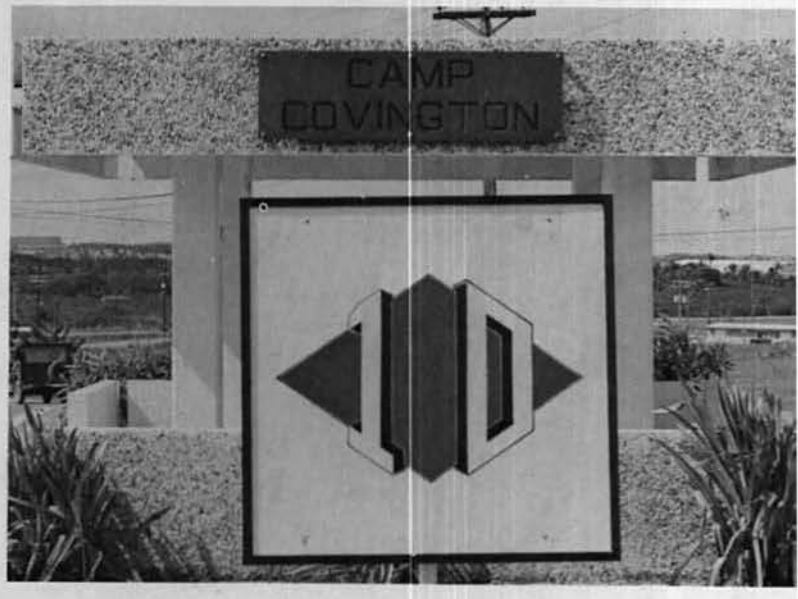
The 1974-75 deployment found the entire force of NMCB TEN on Diego Garcia. It was here that TEN experienced its most concerted deployment since Vietnam for a full battalion effort without any details.

September of 1975 once again found NMCB TEN deployed to Guam, U. S. Trust Territory as the Pacific Fleet Alert Battalion. There were also details deployed to the Naval Communications Station, Finegayan, Guam; Midway Island; Adak, Alaska; and a Seabee team on the island of Palau.

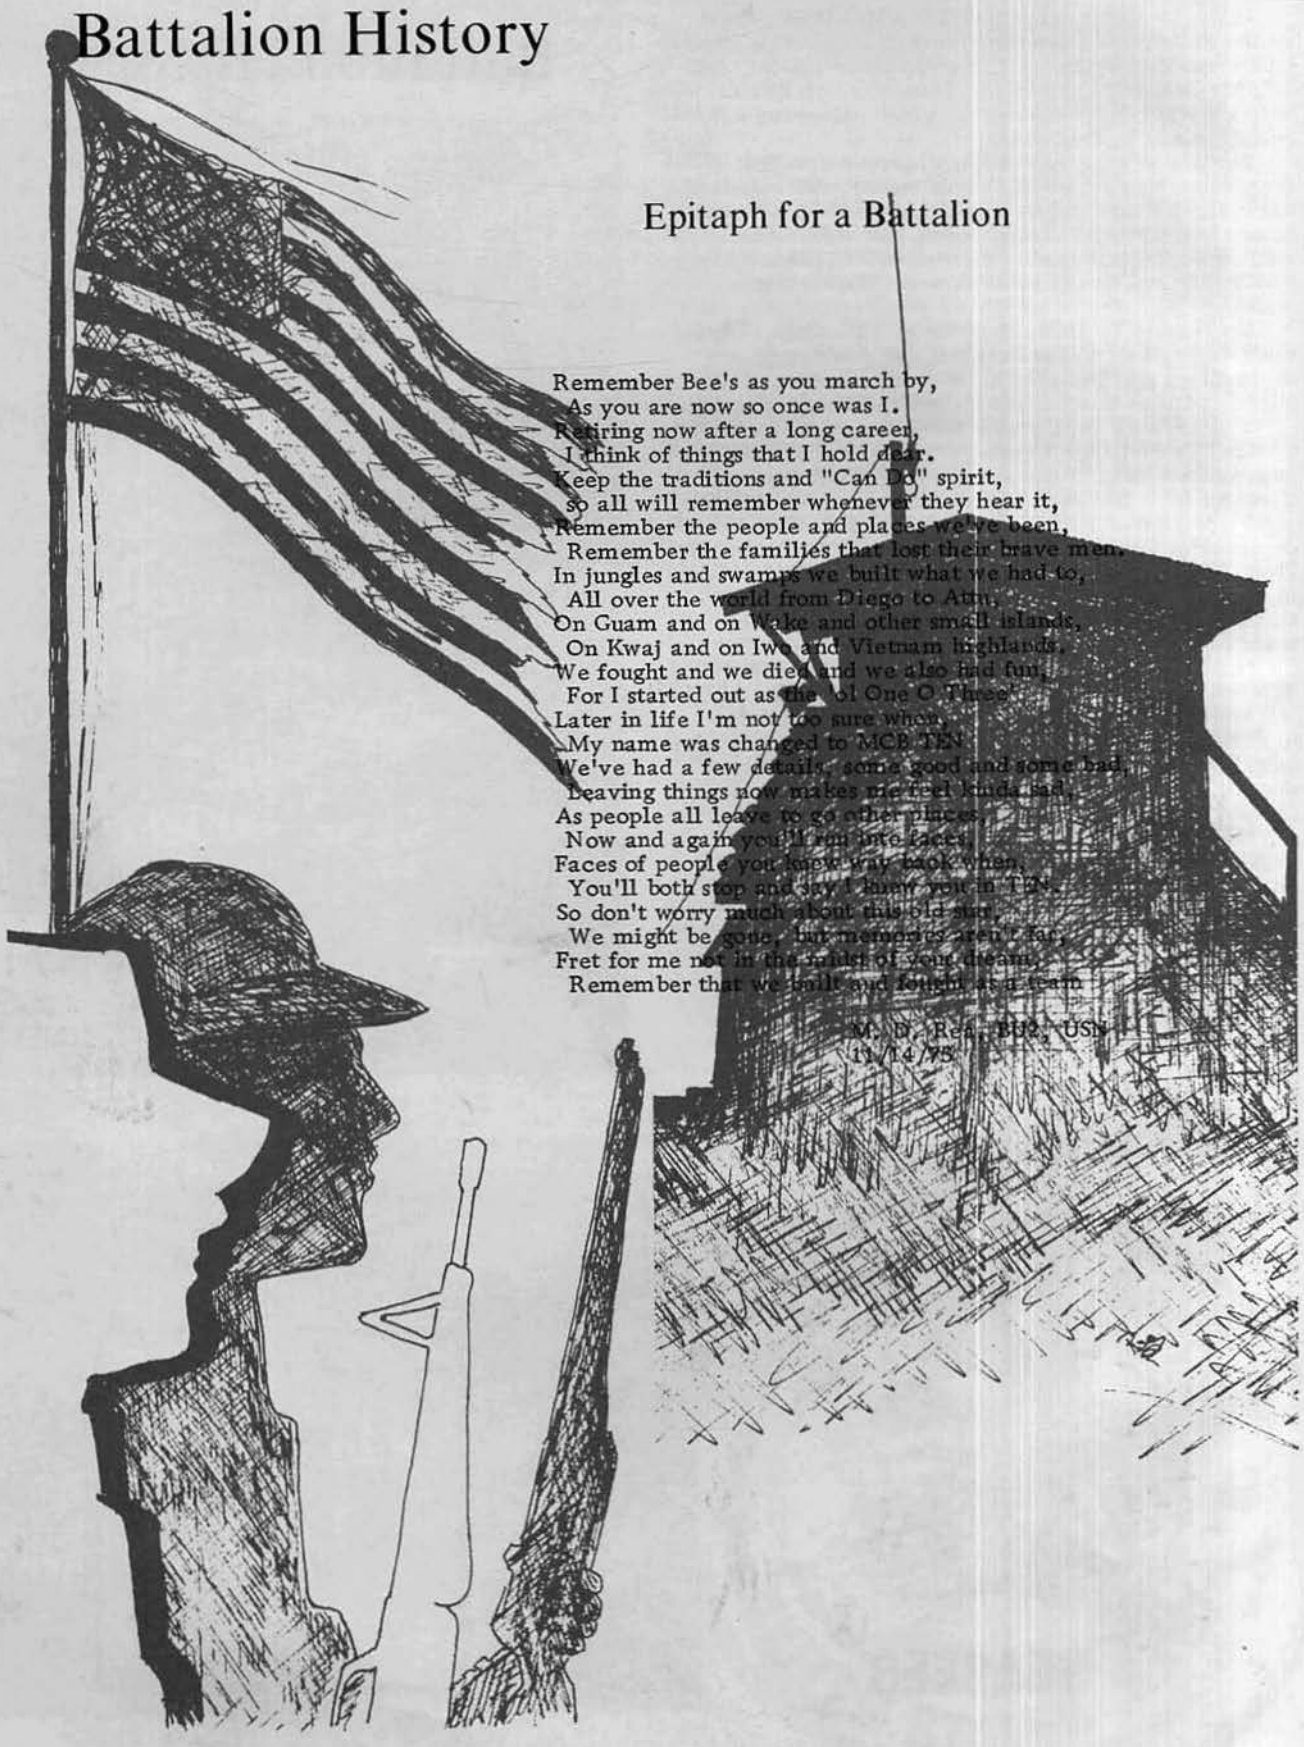
In May, 1976, U. S. Naval Construction Battalion TEN will return to Port Hueneme, California for the last time. On June 30, 1976, NMCB TEN will cease to exist. As the last of the active World War II Seabee battalions, NMCB TEN is scheduled to be decommissioned, concluding an era of over three decades of faithful service.

It is a fitting conclusion to NMCB TEN that she began her construction life in the war-torn jungles of Guam rebuilding for the future, and she returned to that same island, now grown to a modern and rapidly developing part of the United States, for the TWILIGHT CRUISE.





Battalion History

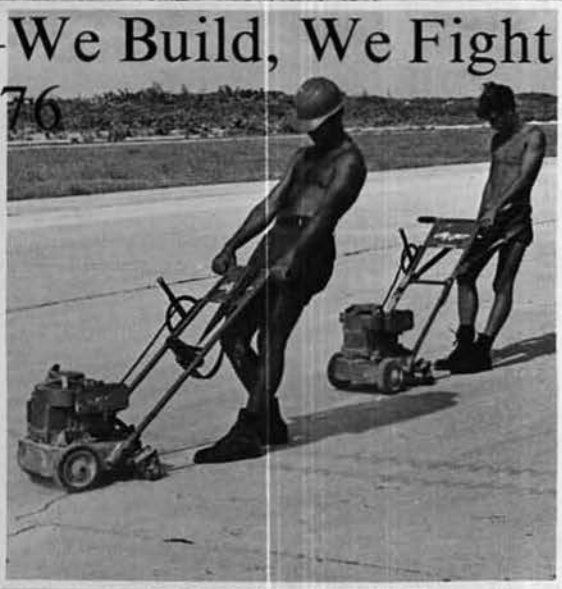


Epitaph for a Battalion

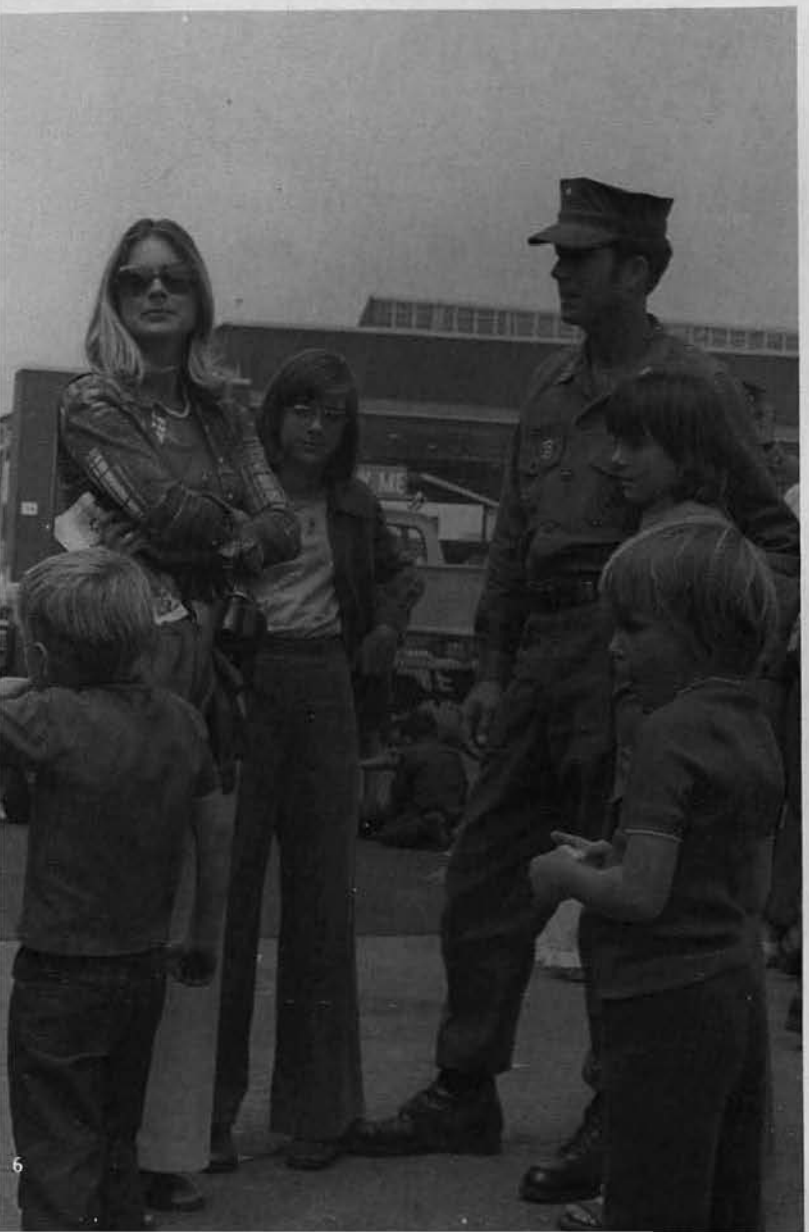
Remember Bee's as you march by,
As you are now so once was I.
Retiring now after a long career,
I think of things that I hold dear.
Keep the traditions and "Can Do" spirit,
so all will remember whenever they hear it,
Remember the people and places we've been,
Remember the families that lost their brave men.
In jungles and swamps we built what we had to,
All over the world from Diego to Attu,
On Guam and on Wake and other small islands,
On Kwaj and on Iwo and Vietnam highlands.
We fought and we died and we also had fun,
For I started out as the 'ol One O Three'
Later in life I'm not too sure when,
My name was changed to MCB TEN
We've had a few details, some good and some bad,
Leaving things now makes me feel kinda sad,
As people all leave to go other places,
Now and again you'll run into faces,
Faces of people you knew way back when,
You'll both stop and say I knew you in TEN.
So don't worry much about this old unit,
We might be gone, but memories aren't fair,
Fret for me not in the midst of your dream,
Remember that we built and fought as a team.

M. D. Rea, BU2, USN
11/14/95

Construimus, Batuimus—We Build, We Fight
1943-1976



Early in September, the saddest day for MCB-10 arrived. It was then that the Men of Ten reported to Pt. Mugu Air Terminal for the long trip to Guam. There was time for a few moments shared, one last kiss goodby and then.....



Off to Guam

CDR. J. B. Caughman, Jr.

Commanding Officer

Commander James B. Caughman, Jr., CEC, USN became the 13th Commanding Officer of U.S. Naval Mobile Construction Battalion TEN when he relieved Commander Thomas F. Stallman, CEC, USN. Commander Coughman was born in Columbia, South Carolina. He attended Clemson University and the U.S. Naval Academy from which he was graduated with distinction and commissioned an Ensign, Civil Engineer Corps, in 1958.

Upon completion of his initial tour with the Public Works Department at the Naval Shipyard, Philadelphia, Commander Caughman attended Rensselaer Polytechnic Institute receiving his Bachelor of Civil Engineering degree in 1960. After attending the CEC Officers School at Port Hueneme, California, Commander Caughman was assigned as Assistant Public Works Officer at the Marine Corps Air Station, Beaufort, South Carolina. Early in 1963, he reported to the U.S. Naval Station, Washington, D.C. for duty.

During 1965 and 1966 he served as Operations Officer U.S. Naval Mobile Construction SEVEN, homeported at Davisville, Rhode Island, and completed deployments to Guantanamo, Cuba; Rota, Spain; and Phu Bai, Vietnam. Upon completion of the Vietnam deployment and return to Davisville, Commander Caughman was ordered to the U.S. Naval Station, Bermuda for duty as Public Works Officer and Resident Officer in Charge of Construction. Selected for the Navy Postgraduate School, Monterey, California and earned a Masters Degree in Management, graduating with honors.

Following a tour as Executive Officer, U.S. Navy Public Works Center, Guam, Commander Caughman reported to the Headquarters, Naval Facilities Engineering Command for duty as Director, Public Works Management Division from 1972 until the present. During the fall of 1974, he was selected as the Civil Engineer Corps attendee at the University of Pittsburg for its two month Management Program for Executives.

Commander Caughman is married to the former Ann Norment Ferguson of North Augusta, South Carolina. They have a daughter, Mary Holmes, and a son, James Bankston, III.

LCDR P. W. McCullagh
Executive Officer

Lieutenant Commander P. W. McCullagh, CEC, USN, assumed his duties as Executive Officer on 20 August 1974 on Diego Garcia.

LCDR McCullagh was born in Sturgis, Michigan, but spent most of his early years in Guthrie, Oklahoma, He graduated from Oklahoma State University in June 1961 with a Bachelor of Science in Civil Engineering. After graduation he accepted a job as an Assistant Design Engineer with the California Division of Highways.

In 1962 he attended OCS and upon graduation he was commissioned an Ensign in the Civil Engineer Corps. His first Assignment was to Taichung, Taiwan for independent Public Works and ROICC type duty, followed by an assignment as Assistant Public Works Officer at the Fleet Anti-Air War Training Center in Dam Neck, Virginia. Next it was back across the Pacific to Vietnam where he was ROICC for the $50 million Newport Project. His next duty station was the Pentagon in Washington, D.C. for a three year tour with the Joint Chiefs of Staff. In 1971, he was ROICC for the Public Works Center at Guantanamo Bay, Cuba, as Planning Officer. He left there in September of 1972 for the Naval Postgraduate School in Monterey, California where he received a Master of Science Degree in June 1974. Just prior to joining the Battalion he attended the Senior Officer's Military Justice course at Newport, R. I.

LCDR McCullagh is married to the former Miss Donna Dempster and have two daughters, Paula and Janet.

When a superstar retires his identifying number is often enshrined. In June 1976, NMCB TEN, a superstar among Mobile Construction Battalions is being retired. As the TEN is removed from the list fo active participants, this identifying number will become enshrined in the annals of time as one of the really great battalions. In Vietnam, NMCB TEN was part of the first amphibious landing subsequent to World War II. During the Vietnam War, NMCB TEN earned thirteen campaign stars and was awarded two Meritorious Unit Commendations and two Navy Unit Commendations. Additionally one of TEN's details was awarded the Presidential Unit Citation. Three times MCB TEN has been selected the Pacific Fleet "Best of Type" and twice has been selected for the coveted "Peltier Award". In homeport the "Men of Ten" have consistently outshown others in community involvement. For the past three consecutive years, NMCB TEN has received award recognition for contributing more money to the Ventura County Combined Federal Campaign than any other battalion. The "Men of Ten's" athletic prowess has also been recognized as the winner of the 1975 Commodore's Athletic Trophy. The "Men of Ten" have served their country and fellow men exceptionally well and have established a niche in history for which they can all be proud. While there may be twinge of sadness at decommissioning the "Men of Ten" can hold their heads high knowing that they helped establish a tradition of excellence which will now serve as a standard for others to seek and surpass. These accomplishments are truly the results of hard work by dedicated men performing in the Seabee "Can Do" spirit. It has been my pleasure and privilege to be your Executive Officer for the past two years. May God richly bless each of you in all your future endeavors.

EQCM R. D. Kimmons
MCPOC

Decommissioning of a battalion means different things to many different people. Orders to sea or shore duty, separation from the navy and new careers. However, this doesn't signify an end to TEN, merely a dispersion of its talents. It is through these very people that TEN will continue to exist, even though it has been removed from the active roles. As any battalions sum is equal to its total number of people, TEN's history is carried on and kept alive by those thousands of men that have served with her since her inception on 15 October 1943 as the 103rd battalion. Consequently even though the number has been put on the shelf, it will continue to live through each and every man who comprised the 103rd and MCB 10. A well done is extended to all. Fair winds and a following sea...you are now a part of history.

LT P. D. LONGO
Administrative Officer

The Administrative Department is comprised of the Personnel, Administrative, Legal and Executive Staff Divisions. The main function of this Dept. is to provide clerical support to the battalion. Included in their multi-faceted operation is the maintenance of personnel records, incoming and outgoing message traffic and correspondence, legal matters, and formulation and maintenance of the battalion instructions. The personnel of S-1 make up the bulk of MCB-10's "Fleet Bees".

S-2

The heartbeat of the Guam deployment originates from within the S-2 Department. Their task can be summed up in one word: "training". It is the role of S-2 to provide continued readiness training for the personnel of MCB-10. Also included under the cognizance of S-2 are Communications, the Armory and the Educational Services Office. One very vital part of S-2, from a morale standpoint, is the operation of the MARS station, which supplies the men with their link with home.

The Operations Department's job is an immense one. It is responsible for planning, scheduling and monitoring all construction projects for which MCB-10 has been tasked. It has been said that the Operations Department is a battalion unto its own and indeed it seems at times that it is. They often seem to be an independent entity, as work progresses and guidance issues forth from Ops. Although not quite Shakespearean their motto could well be "Veni, Vidi, Construmius" (I came, I saw, I built).

Supply! The magic word that keeps the battalion functioning. From a small repair part to payday to feeding the men, Supply does it all. Without the men of Supply, MCB-10 would not be. These are the people who control the funds, the food, and the tools. Their hours are long and the praise short, but through it all the supply people keep the MCB-10 machine moving.

For the purposes of this publication, the Supply Department has been divided into two sections. The first section is the Materials Division and it includes the supply office personnel, MLO, CTR and repair parts. The second section is the Support Services Division and it includes the personnel of the Galley, Disbursing Office, the Barbershop and the Laundry.

Company Chief

BUC D. G. ATHMAN

"Bravo" is the name and maintenance is the game. All of the battalion's CE's and UT's headquarter themselves in Bravo Company. It is their never-ending task to ensure that the camp remains in repair. Patching walls, unstopping drains, repairing electrical problems, and occasionally providing their technical expertise on all the construction projects all fall into the bag of this talented company. A by-line of Bravo is fine cabinetry work. A small contingent of builders are assigned to this company to take care of carpentry.

Contractors, contractors, contractors! Get it done and do it right. Thus say the men of Delta. They are our builders, the true builders of TEN. From the Steelworkers to the Builders, Delta does the project. They are the men who are responsible for the construction of every major assigned project. Those projects worked on Guam bear the indelible stamp of Delta Company.

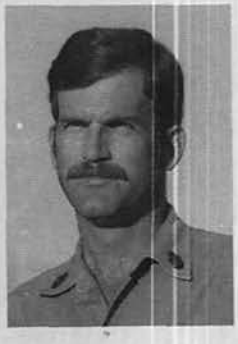
Finegayan Detachment

ENS. W. L. NELSON
OIC



SWC P. V. VOORHIES

For most of the men at Detachment Finegayan the Guam deployment at the Naval Communications Station was another opportunity to stop and assess the application of their construction abilities. From the staking of batter boards to the final days of moveout, practical skills were tried and tested, reaffirmed and developed.

A pre-engineered building was erected for use as a locker room/recreation facility at Andreen ball park. An additional field with back stop was also prepared to expand existing facilities for NCS personnel. The Child Day Care Center received a CMU addition which enlarged the existing area by 100%. By deployment's end a 40' x 80' community building in South Finegayan housing area neared completion.

Additionaly, it shouldn't be forgotten that the detachment was the first to board the Vietnamese refugee ship, "Thong Tin I" for the refurbishing of her cargo area. The Finegayan Detachment also participated in the demolition of seahuts used by some Vietnamese Refugees at Camp Socio. Still other projects included the laying of a 3" communications cable through dense, tropical vegetation for which the crew received a letter of appreciation. Touch-up work was also completed on the new NCS CPO club and a 40' x 100' pre-engineered storage building.

While reaping these professional skills, the detachment enjoyed an outstanding living environment at NCS. Comaraderie was not only developed on the job site, but was shared in the searching for the mysterious Tweed's Cave, all-day excursions about the island, numerous beach parties, the giving of gifts on Christmas morning and Jimmy Gowan's daily reading of the plan-of-the-day. Construction not only became a career experience, it became a human experience.

Midway Detachment

LT James H. AUGUSTIN
Detachment OIC

BUCS Ronald A. WEINERT
Detachment AOIC

USNMCB Ten's Midway Detachment, better known among its members as, "Diamond Jim's Mid-Pacific Construction Company," was deployed to Midway Island with the mission to conduct quality construction while maintaining mobile military preparedness as part of the "ready" battalion. Their major projects were comprised of rehabilitating a two and three-story barracks, which included framing and partitioning open bays into private rooms, reconstruction of lavatory facilities, fabricating and installing new type windows and fire escapes. With the detachment's high efficiency and the good weather, the two barracks jobs were completed with excellent quality, despite material and augment tool shortages.

With Midway being such an exotic, interesting and enjoyable little island the detachment members were always excited to receive official visitors and show them around. The special visitors included Ten's CO, MCPOC, XO, OPS Officer, Supply Officer, chaplain and career counselor and numerous 31st NCR, NCF support personnel. These visits helped make the Midway Detachment proud not only of their projects but proud of themselves.

Needless to say, morale was held high among Diamond Jim's crew and the deployment to Midway will always be remembered favorably by those in the detachment and by those who shared in their experience.

ADAK Detachment

SWCS C.E. MEEKS
Detachment OIC

EOC J.L. STINNETT
Detachment AOIC

USNMCB TEN's Adak Detachment consisted of 41 enlisted personnel deployed to Adak Alaska to complete the erection of ten communications antennas.

Adak is a mountainous rock and tundra island in the Aleutian chain with a very cloudy, wet and cold climate. While the snow and cold set in for the winter and most other construction efforts ground to a halt, det. Adak had anxiously awaited the ground and mud and water to freeze so that they could begin some serious project progress. Fill-in-projects of parking lot and road repair as well as various dump consolidations were also worked on.

When the weather got really nasty, indoor efforts toward equipment and vehicle repairs were in full swing.

A steady stream of battalion 31st NCR and technical support personnel visited the detachment , were given a "warm" welcome and then able to share in many of the unique hardships and good times that will always be remembered by the "Men of Ten, Det. Adak".

A fitting conclusion to the long history of a proud Battalion is to be found in the following prayer for all Seabees. For, after all, the Men of Ten are not being decommissioned. Their orders will take them to other battalions, other duty stations, and other job sites where they will continue to perform in the highest tradition of the Seabee "Can Do" spirit:

Lord, stand beside the men who build,
And give them courage, strength and skill.
O grant them peace of heart and mind,
And comfort loved ones left behind.
Lord, hear our prayer for all Seabees,
Where'er they be on land or sea.

R.J. Dietrich

To all, "Fair winds, and following seas."
