

Knot Magic

It's not magic, it's just a knot!

Materials

- 24" long piece of ¼" thick rope

Process

1. Hold your hand out as though you are going to shake someone's hand.
2. Drape the rope over your hand.
3. Pull the rope on your palm behind your pinky finger
4. Use your free hand to pull the rope on the back of your hand under your hand and hold the end between your pointer and middle fingers
5. Let all your fingers except your pointer and middle fingers go loose (including your pinky)
6. Point your fingers toward the ground and shake your hand
7. Let the rope on the back of your hand slip over your knuckles and past your fingers
8. Practice getting faster with this knot. Can you do it one handed? Can you do it so fast people don't know how you tied it?
