

# Index

The nature of this volume as a chronology allows for the creation of an index, albeit unusual, that is more precise and quicker for the reader to use. Rather than indicating a page, this index directs the reader to a specific area on the page by citing a date.

The entries give the year, month, and date in this format: 1948Nov12.

The citation is found by first looking at the running heads at the top of each page, which indicate the year covered. The specific date is then found chronologically within the section. In some instances only a year and month are given. There are specific entries for such citations, which appear before the first day of the indicated month.

To further aid the researcher the index has been broken into six major subject groups: Aircraft by Designation, Aircraft by Name, Missiles and Rockets, Ships, U.S. Military Units, and Individuals. Topics that do not naturally fall under those headings are listed in the General index.

## CONTENTS

Aircraft by Designation	607
Aircraft by Name	623
Missiles and Rockets	639
Ships	643
U.S. Military Units	661
Individuals	681
General Index	701

# Aircraft by Designation
