# Help Eugene Fly Ashore!

Can you help Eugene Ely fly ashore?

Simply follow the right path through the maze to help Ely find his way to the shore.

In November of 1910, pilot Eugene Ely flew his Curtiss biplane off a flight deck constructed on the USS *Birmingham*. The flight went from the ship's deck to nearby Willoughby Spit and lasted only five minutes. The success of this flight led to future aircraft carriers, which are currently used in our naval forces.

# Find the Differences

The CSS *Florida* was a Confederate blockade runner during the Civil War. The Hampton Roads Naval Museum is the repository (a safe place to store items) for artifacts from CSS *Florida*.

Circle the differences in these two images of CSS *Florida*.

Hint: There are four differences to discover!

# Silent Signals

Ships can send messages without saying a word. They can use these signal flags to spell a message to other ships and sailors.

Using the flags on the next page, figure out what the message says:

## Did you notice?

Each letter has a name-like Alpha for "A". This is because some letters sound alike when you say them, like "p" and "d" or "s" and "f". So, when sailors spell something over the ship's radio, they spell with the letters' names to avoid confusion.
