CNO: Shore and Fleet Organization Branch (SNDL) Collection COLL/94

Accession Numbers: [See Accession Number Listing](#)

Creator: Chief of Naval Operations (CNO) Shore and Fleet Organization Branch Office

Extent: Total boxes: 399
Cubic feet: 133

Inclusive Dates: 1942-2009

Access: Each accession identifies the level of classification existing in that particular group of records and the level ranges from unclassified to classified pending declassification or further review.

Classification: The first part of the collection covering Boxes 1 through 63 have had a Declassification Review and are open to all researchers. The remaining group of records beginning with Box 64 have some restrictions because they still have classified records that require further declassification review. The description following each Accession identifies the restrictions for that particular group of records. Most of the accessions have had an initial declassification review and have some records that have been referred to other agencies for further review.

Scope and Content Note

The initial collection covering the first 63 boxes was received from CNO's N09B22 Office (Shore and Fleet Organization Branch, sometimes called the SNDL Office). The other sections of the collection have been received from CNO's N09B22/N09B16/DNS-3 Office in various accessions over a long period of time.

The records in this collection are the source folders for the Navy's Administrative/Command Organization covering its Shore and Fleet (Operating) Commands. It essentially provides the layout of the Navy's structure by command, organization, or office. The folders will contain fact sheets, mission statements, home ports, redesignations, establishment/disestablishment/commission/decommission dates, organizational assignments and other miscellaneous data.

The initial part of this collection (Boxes 1 through 63) is comprised of approximately 24 linear feet of records consisting of 5" x 8" cards. These records span the period from World War II to the mid-1990s. The cards contain information on the establishment and/or commissioning authority, mission, designation and administrative changes, and disestablishment and/or decommissioning authority for the Operating Forces (Fleet commands) of the Navy and the Shore Activities of the Navy.

The Naval History and Heritage Command's (former Naval Historical Center) Archives Branch, Operational Archives Section received the initial collection from CNO's N09B22 Office and continues to receive accessions to the collection when N09B22 closes out its files. Outside of the initial card collection received from CNO's N09B22 Office, which consisted of Boxes 1 through 63, all other accessions received from CNO's N09B22 are in legal sized folders with appropriate paper work documenting the establishment/commissioning, mission, designation and administrative changes, and disestablishment/decommissioning data for each individual Naval command, organization, or office. Each accession is maintained in the filing order in which it was received. The folders are identified by name of command/organization/office or subject and the associated time frame covering each folder. In most cases the folders name identifies the last known name of the command/organization/office. Documentation within the folder should trace the redesignations/name or title changes and other appropriate changes of that command/organization/office. The range in dates for the various accessions is a result of the disestablishment/decommissioning of commands/organizations that have a history and lineage that can be traced back to its original establishment/commissioning date. There is no specific pattern or schedule for the timing of a command/organization's disestablishment/decommissioning. When a command/organization is no longer active the respective file folders are consolidated by CNO's N09B22 Office and transferred to the Naval History and Heritage Command, Archives Branch.

The initial collection (Boxes 1 through 63) comprises approximately 24 linear feet of 5" x 8" cards which were compiled by the staff of the CNO's Shore and Fleet Organization Branch (N09B22) Office. The cards are arranged into two series according to the Standard Navy Distribution List (SNDL) Parts 1 and 2.

The information contained in the more recent cards, Form OPNAV 5110/14 (11-81), includes: activity name; SNDL code; official title and mailing address; UIC number; activity code; shore title; chain of command/support exercised thru; area coordinator; regional area coordinator; former SNDL and activity code; status of military official in command; and authority for entries from official correspondence. The mission statement is on the reverse side of the card. The cards prior to 1981 contain similar information in a slightly different format.

The collection provides a wealth of information and history on the composition and organization of the U.S. Navy and U.S. Marine Corps over a 50 year time period. It also provides information on the establishment/commissioning, redesignation and disestablishment/decommissioning dates that may not be available from other sources. The area coordination data provides a horizontal overview of shore activities and the relationships between and among such activities.

In order to determine the appropriate identifying SNDL code number for a unit or activity, the collection of Standard Navy Distribution Lists (SNDL Part 1) and Catalogs of Naval Shore Activities (SNDL Part 2) held by the Archives Branch, Operational Archives Section will have to be consulted. These publications span the years from 1942 to 1991. The SNDL's are filed as paper copies in the Series Files under CNO/OPNAV for the Post-1946 Command Files, Post-1974 Command Files and Post-1990 Command Files. The location of these SNDLs are as follows:

Post 1 January 1946 Command File: (Boxes 468-470)

1946-1950

1958-1960

1965-1966

1968-1973

Note: Nothing on file for the years of 1951-1957, 1961-1964, or 1967

Post 1 January 1974 Command File: (Boxes 96-98)

"Catalog of Naval Shore Establishments (SNDL)" written on the boxes

1974-1982

1984

1986-1987

Note: Nothing on file for the years of 1983, 1985, 1988-1989

Post 1 January 1990 Command File: (Case 9, Drawer 2. This will change when this collection is placed in boxes and shelved.)

1990

1994 (printout for electronic version)

1996-1999 (printout for electronic version)

Note: Nothing on file for the years of 1991-1993, 1995, 2000-2007

After 1991 the SNDL was no longer published in paper but made available electronically. The current version of the SNDL may be viewed at <http://doni.daps.dla.mil/sndl.aspx>.

The Command History Reports/Command Operations Reports held in the Post-1946 Command File Collection, Post-1974 Command File Collection, Post-1990 Command File Collection, Post-2008 Command File Collection, the Aviation Archives and Ships Archives can be consulted for additional information on the post-World War II naval units and activities. The Command History program was re-instituted in the late 1950s and requires all units and activities identified in the SNDL Parts 1 and 2 (Admin Fleet Chain of Command and Admin Shore Chain of Command) to submit an annual command history/operations report. The initial report of a unit or activity usually includes information on when that unit or activity was established/commissioned and gives a narrative account of its accomplishments. Following the initial report after establishment/commissioning the unit or activity thereafter submits an annual command history/operations report that details its activities for that year.

The Series I and II that follow are only for the initial collection covering Boxes 1 through 63.

Series I, SNDL Part 1, contains the Operating Forces of the Navy (which includes ships, squadrons, and fleet units), the Unified and Specified Commands, U.S. elements of International Command, and Military Sealift Command USNS Ships. Codes are numeric-alpha with an end Number that identifies the specific FLTCINC (Fleet Command-in-Chief) the unit reports to for administrative command. Lists ending in “1” are generally Atlantic Fleet units while lists ending in “2” are usually Pacific Fleet units. The numeric prefix in the SNDL code also distinguishes the unit as a fleet activity versus a shore activity or detachment which contains an alpha prefix.

Series II, SNDL Part 2, is the authoritative, official list of all shore activities of the Department of the Navy (DON). This part of the SNDL contains addresses of: (1) DON Shore activities and staff offices officially established by the Secretary of the Navy; (2) CNO (N09B) established detachments; (3) SECDEF and DoD agencies; and, (4) miscellaneous non-Navy activities with Naval personnel assigned. Only DON formally established shore activities are assigned 7-digit codes in Part 2. First 4 digits identify series or functional type, last 3 digits arrange like activities alphabetically by city.

SNDL number (e.g., FG2) is an alpha-numeric code that segregates shore activities, detachments, commands, offices, etc., by their reporting relationships/command structure and differs from the activity codes. Naval Air Stations, for example, are categorized under the 14XX-XXX series activity codes. The SNDL code assigned to Naval Air Stations under CINCLANTFLT is FA6, whereas SNDL code assigned to air stations under CINCPACFLT is FB7.

The Series I and II arrangement was not followed for the remaining collection beginning with Box 64. After receipt of the initial card collection covering Boxes 1 through 63, the following record accessions received from CNO’s N09B22 Office have been received in legal sized folders with appropriate paper work documenting the establishment/commissioning, mission, designation and administrative changes, and disestablishment/decommissioning data for each individual Naval command, organization, or office. Each accession is maintained in the filing order in which it is received. The folders are identified by name of command/organization/office or subject and the associated time frame covering each folder. In most cases the folders name identifies the last known name of the command/organization/office. Documentation within the folder should trace the redesignations/name or title changes and other appropriate changes of that command/organization/office. The range in dates for the various accessions is a result of the disestablishment/decommissioning of commands/organizations that have a history and lineage that can be traced back to its original establishment/commissioning date. There is no specific pattern or schedule for the timing of a command/organization’s disestablishment/decommissioning. When a command/organization is no longer active the respective file folders are consolidated by CNO’s N09B22 Office and transferred to the Naval History and Heritage Command, Archives Branch. Each Accession will have a brief description of its records.

Box Listing

The Box Listing begins with the initial collection covering Boxes 1 through 63. Thereafter the box listings are segregated by Accession numbers, however, the numerical box listing continues in a normal sequence. So the box number in the first accession listed begins with Box 64.

For Boxes 1 through 63, in order to determine the appropriate identifying SNDL code number for a unit or activity, the collection of Standard Navy Distribution Lists (SNDL Part 1) and Catalogs of Naval Shore Activities (SNDL Part 2) held by the Archives Branch, Operational Archives Section will have to be consulted. These publications span the years from 1942 to 1991. After 1991 the electronic SNDL versions on CD-ROM are available covering 1992 to 2000.

Processed by Roy Grossnick
May 2010

Description:

This accession (number 2001-962, old number 887200) was received from OP-09B22 (Organization Management Branch/Shore and Fleet Organization Branch) on 14 September 1988. It consisted of 10 record center boxes and had records that were classified up to Secret. The accession had an initial Declassification Review with various records referred for further declassification review. The accession records covered the timeframe from 1945 to 1984. The file folders were labeled with the name of the organization and timeframe (sometimes the folder included the OP code for the office). Almost all the organizations included in this accession were from CNO's offices.

The following Box Listing is from Accession Number 2001-962 (887200):

Box 64

Processed by Roy Grossnick

May 2010

Description:

This accession (number 2001-990, old number 887230) was received from OP-09B21 (Headquarters Organization Branch) on 8 November 1988. It consisted of 6 record center boxes that were identified as unclassified in the SF-135 that transferred to records. The accession records cover the timeframe from 1986-1988. The file folders were labeled with the name of the organization/subject and timeframe. Note: Per consultation with the Head, Archives Branch, Mr. Curtis Utz, Record Center Boxes 1, 4, 5, and 6 of this collection contained handwritten and typed Functional Analysis Forms from 1986 for various OP Codes that were determined not worthy of retention because the data compiled was incorporated in other reports such as those found in Boxes 226 through 229 of this accession collection, as listed below.

Processed by Roy Grossnick
August 2010

Description:

This accession (number 2010-1) was received from CNO's DNS-33 Office on 25 January 2010. It consisted of 10 record center boxes. The accession did not identify whether the records were classified or unclassified. However, during the processing there was a limited number of records that were stamped Confidential and Secret. The majority of the collection contained records that were created as unclassified. **Due to the limited number of records that were identified as classified this collection will need a Declassification Review.** The accession records cover the timeframe from 1946 to 2008. The file folders were labeled with the name of the Subject, Organization and Disestablishment, Decommissioning and Changes timeframe.
