COMMAND HISTORY USS BLACK HAWK (MHC 58)

BLACK HAWK (MHC 58) is the eighth ship in the U. S. Navy's OSPREY Class Coastal Minehunter Program and the third U. S. Navy ship to bear the name. BLACK HAWK's keel was laid on September 3, 1992, and her christening and launching took place on August 27, 1994. MHC 51 Class ships are the world's largest Glass Reinforced Plastic (GRP) ships and the first U. S. Navy ships designed solely for mine hunting, the technique of locating mines with sonar and neutralizing them with a remotely controlled underwater vehicle. The ship's mission is to clear harbor, coastal and ocean waters of acoustic, magnetic and pressure/contact type mines, utilizing reconnaissance, classification and neutralization tactics. The MHC 51 Class design integrates modern mine countermeasures technology into a uniquely designed platform. The ship is protected during mine hunting operations with an exceptionally low magnetic and acoustic signature.

01-06 JANUARY 1997 *1998 port*

BLACK HAWK continued a traditional holiday stand down period.

01 JANUARY-20 MARCH

BLACK HAWK continued Post Shakedown Availability at South Texas Ship Repair Facility in Aransas Pass Texas.
