b. Port Visits:

30 JUN - 04 JUL	PORT VISIT, PORT CANAVERAL
18 AUG - 01 SEP	PORT VISIT GROTON (TRE WORK-UP)

3. Narrative.

1995 proved to be a challenging and rewarding year for the officers and crew of the RICKOVER. The ship spent January of 1995 conducting local independent steaming operations and dedicated inport training. In early February, RICKOVER transited to the Key West Operating Areas and conducted several weeks of shallow water operations in support of a CNO Project. Following these operations, the ship successfully completed a surprise Operational Reactor Safeguards Examination and returned to Norfolk in early March. The remainder of March was spent inport Norfolk preparing for a Selected Restricted Availability (SRA) which lasted from late March through early June at Norfolk Naval

Shipyard. The crew spent countless manhours during this two-month period ensuring the ship was in superior condition for further sea-going operations.

In early June, RICKOVER completed sea trials, acoustic trials, and transited to the Cape Canaveral Operating Areas for three weeks of Midshipmen Operations. These three weeks provided an excellent opportunity for the crew to show the Navy's future leaders the extensive capabilities of one of America's finest front line submarines along with the high degree of camaraderie shared by submariners.

From 7-10 July, RICKOVER conducted a Tiger Cruise from Cape Canaveral to Norfolk Virginia. The remainder of July and first half of August were spent conducting the first of two scheduled Pre-Overseas Movement (POM) Maintenance Upkeeps. In mid-August, RICKOVER transited to Groton, CT for two weeks of dedicated pre-deployment training. After successfully completing this training, RICKOVER took to sea again in early September for a Tactical Readiness Evaluation and Weapons Firing Certification.

After the examination, RICKOVER completed two weeks of at sea pre-deployment training, and then spent October and half of November completing a second POM Maintenance Upkeep. For the remainder of November and first two weeks of December, RICKOVER conducted vigorous training for POM Certification. The ship successfully completed POM Certification the week of 11-15 December, and spent the remainder of 1995 inport completing final preparations for deployment in early 1996.
