USS McCAMPBELL HISTORICAL NARRATIVE

1 January 2003 - 31 December 2003

McCAMPBELL began 2003 with the Command Assessment of Readiness and Training, Phase II (CART II), conducted the week of January 13-17. Areas identified for further training were addressed during McCAMPBELL's Tailored Ship's Training Availability (TSTA), January 21 through April 7. This 11 week period was compressed from the notional 16 weeks to support McCAMPBELL's deployment as part of operation CAPER FOCUS. McCAMPBELL's crew rose to the challenge, passing the Final Evaluation Period (FEP) with flying colors.

Throughout TSTA, McCAMPBELL remained occupied, serving as part of the Opposition Forces (OPFOR) for the USS NIMITZ (CV 68) Battle Group Composite Training Unit Exercise (COMPTUEX) January 24-29. Her Combat Direction Finding (CDF) Suite was calibrated January 30. McCAMPBELL's strike warfare team completed a successful Cruise Missile Tactical Qualification the week of February 18-21.

McCAMPBELL conducted its Final Contract Trials by the Board of Inspection and Survey during the week of February 24-28. Again, her crew performed superbly, passing with seven of eight tests performed at the satisfactory level and only one marked degraded.

Before the end of TSTA, McCAMPBELL's engineering department completed a successful Underway Demonstration (UD) March 18. Her Force Protection Training Team (FPTT) performed flawlessly during force protection training with Afloat Training Group, Pacific (ATG PAC), resulting in the combination of phases I with II, and III with IV of that training.

McCAMPBELL commenced her pre-Counter Drug Operations (CDOPS) standdown April 9-18. Her crew took a quick breather before becoming the first Flight IIA DDG to deploy before entering Post-Shakedown Availability (PSA).

McCAMPBELL departed San Diego for CDOPS on April 19. Joining her were Helicopter Squadron Light (HSL) 43 Detachment Five and US Coast Guard Law Enforcement Detachment (LEDET) 105. Under the Tactical Control of Joint Intra-Agency Task Force (JIATF) West, McCAMPBELL patrolled the Eastern Pacific in search of go-fast and logistics support vessels used by drug traffickers.

McCAMPBELL arrived in Puerto Quetzal, Guatemala, to conduct a Brief Stop for Fueling (BSF) on April 28. A week later, McCAMPBELL anchored just outside of Puerto Vallarta, Mexico, from May 6-9.

On May 12, McCAMPBELL's LEDET boarded the Canadian-flagged fishing vessel SIN RUMBO. During a routine search, they

discovered 1.36 metric tons of cocaine onboard. McCAMPBELL took the master of the vessel and the drugs into custody. The following day, McCAMPBELL destroyed SIN RUMBO with her 5"/62 caliber Gun Weapon System. Another BSF in Puerto Quetzal, Guatemala was conducted May 17 before the drugs and the detainee were transferred to law enforcement authorities in the vicinity of Golfito, Costa Rica on May 19.

McCAMPBELL took another break from CDOPS May 27-30 for a port visit to Mazatlan, Mexico. Two weeks later, her crew visited their last port in Panama City, Panama on June 10-12.

McCAMPBELL arrived in Seal Beach, CA, the morning of June 23. She stayed overnight to complete the unloading of her ammunition, then returned to San Diego for the end of CDOPS on June 24. Once in port, workers from Southwest Marine were soon busily assembling scaffolding and preparing the ship for PSA. McCAMPBELL's crew moved to their berthing barge the week of June 30-July 3. An extended standdown period for the crew began on July 4, encompassing five leave periods.

Early on the morning of July 8, McCAMPBELL used two tugs for her deadstick move from Naval Station San Diego to the Southwest Marine shipyard, where she entered drydock and commenced her PSA. An extensive overhaul of all systems on the ship began. On July 26, with below waterline work completed, McCAMPBELL moved from drydock to a Southwest Marine pier. Work continued throughout the next two months.

September 5 marked the first of many PSA completion milestones as McCAMPBELL's Aegis Weapons System was lit off. The week of September 22 saw McCAMPBELL's crew reclaiming the ship through move aboard, dock trials, and a fast cruise in preparation for sea trials September 30. The ship's first extended underway period was October 6-9.

McCAMPBELL spent the next two weeks inport undergoing repairs to all ten propeller blades. Two compressed underway periods followed as the ship made final preparations for her second CDOPS deployment. On Sunday, October 26, Claire Montgomery, daughter of CDR Montgomery, was christened in the ship's bell.

McCAMPBELL sailed for CDOPS November 3, again embarking LEDET 105 and HSL 43 Det Five. While patrolling the eastern Pacific, she assisted in a custody transfer of five detainees from the USS STEPHEN W. GROVES to Panamanian law enforcement November 17-19, and a medical evacuation in conjunction with the USS RENTZ November 25-26. Her crew enjoyed liberty in Panama City, Panama, from November 20-23, and the wardroom held a Dining In Ceremony in Panama City November 20.

Once underway again, McCAMPBELL assisted in an alien migrant interdiction case, escorting a small boat with 112

Ecuadorians to Puerto Quetzal, Guatemala. McCAMPBELL's embarked SH-60B, Battlecat 25, saw action on December 9 when its crew was tasked with destroying a go-fast discovered by the USCGC BOUTWELL. A port visit in Cabo San Lucas, Mexico, followed from December 12 to 15. McCAMPBELL finished her second CDOPS with a brief transit to San Diego, arriving December 17.

December 19, Commander Russ Hass assumed command of McCAMPBELL. A standdown period from December 19 to January 12, 2004, ended the year. During calendar year 2003, McCAMPBELL expended 502 rounds of 5" ammunition, conducted one torpedo shot, 495 hours of flight operations, and completed 23 underway periods (eight of which exceeded five days duration). A total of seven underway replenishments were conducted in the completion of 46,800 nautical miles of underway operations. The ship was underway for 128 days, in homeport for 220 days, in continental U.S. ports for one day, and in foreign ports for 15 days.
