3. Narrative. The majority of 1995 was dedicated to preparing for and successfully executing USS MONTPELIER's first overseas deployment. The beginning of the year found MONTPELIER involved in JTFEX 95-1, the final joint exercise to certify the USS THEODORE ROOSEVELT (CVN 71) Carrier Battle Group prior to departing for the Mediterranean in March. This exercise once again emphasized the importance of coordination in effectively utilizing the submarine in a Battle Group environment. Shortly after completing JTFEX 95-1 and returning to Norfolk, the requirement to have three submarines assigned to carrier battle groups in the Mediterranean was reduced to two. USS KEY WEST (SSN 722) and USS BATFISH (SSN 681) remained assigned to the THEODORE ROOSEVELT Battle Group, while MONTPELIER was reassigned as an independent operations submarine for the duration of the deployment.

On 22 March, MONTPELIER departed Norfolk for its Mediterranean deployment and, after a delay in entering through the Straits of Gibraltar because of heavy weather, was inchooped to Submarine Group Eight. The highlights of MONTPELIER's deployment included several weeks participation in Operation Sharp Guard enforcing United Nations' sanctions against Bosnia-Herzegovina, participation in several coordinated training exercises with elements of the THEODORE ROOSEVELT Battle Group and foreign naval vessels, and visits to liberty ports throughout the Mediterranean. A brief summary of the ship's deployment is provided as enclosure (2), a copy of the Deployment Debrief presented to Vice Admiral Emery (COMSUBLANT) upon returning to Norfolk. The deployment drew to a close with a scheduled Operational Reactor Safeguards Examinations and ended when MONTPELIER returned home to Norfolk, VA, on 30 AUG. Enclosure (3) provides a description of many of the lessons learned during MONTPELIER's first Mediterranean deployment, while Enclosure (4) includes the major press releases that the ship generated while on deployment. USS MONTPELIER was awarded both the Navy Unit Commendation Medal and the newly authorized NATO and Armed Forces Service Medals for its participation in Operation Sharp Guard during the deployment.

Following the deployment, MONTPELIER enjoyed approximately two weeks of stand-down, before entering an upkeep period in preparation for its upcoming underway in OCT. This upkeep was significant because it was the first performed by the Regional Maintenance Center (Norfolk Naval Shipyard) in the Navy's effort to phase out the submarine tenders based in Norfolk. As might be expected there were difficulties to overcome in bringing together a new process of this magnitude, but the end product was a submarine that was ready in all respects to go to sea.

Subj: COMMAND HISTORY (U)

MONTPELIER departed on 24 October to conduct Prospective Commanding Officer Operations in the Puerto Rico Operating Areas, followed by the ship's Tactical Readiness Evaluation on the AUTEK Ranges. Both events exercised the crew's capabilities for conducting the entire spectrum of submarine operations and raised the ship's level of proficiency dramatically. MONTPELIER finished the year in its homeport of Norfolk, VA.
