June 2004

01-23 In-port, restricted availability continues. Pier 11, Berth C, PNSY.

Subj: COMMAND HISTORY FOR 2004

24-30 Berth shift from Pier 11, Berth C, to Pier 13, Berth B. USS MONTPELIER enters dry-dock and begins Depot Modernization Period.

July 2004 - December 2004

ALL DATES - Depot Modernization Period continues.

4. Narrative: Prior to changing homeport to Portsmouth, New Hampshire the MONTPELIER was involved in various at-sea evolutions to support tasking. In January the MONTPELIER was employed as a target for MK 54 air-dropped torpedo testing. Shortly thereafter MONTPELIER on-loaded Tomahawk Block IV torpedo tube launched canisters and successfully launched the compliment to support capability testing for the new variant of the Block IV Tomahawk. At the end of January the ship had two opportunities to allow riders. The first was designated as a "Namesake City VIP Cruise." While MONTPELIER returned to homeport family members were allowed to ride on the designated "Tiger Cruise."

During February the ship began a 5 week upkeep, which saw the Change of Command from CDR William J. Frake to CDR Mark E. Davis. This upkeep was followed by an underway in which the ship was again utilized for target services. After a brief stop for personnel, an INSURV inspection was conducted. During the final two months prior to changing homeport to Portsmouth, New Hampshire, the MONTPELIER was employed for the assistance of POM certifications and target services. Also, MONTPELIER had the opportunity to host a VIP cruise before making final preparations for the change of homeport.

Upon arrival in Portsmouth, New Hampshire, MONTPELIER commenced a Depot Modernization Period (DMP). During the DMP, MONTPELIER was updated with state-of-the-art equipment in the engine room and a variety of upgrades forward. At the end of 2004 MONTPELIER was half-way the scheduled DMP.
