3. NARRATIVE

During the months of January through March, SAFEGUARD was responding to short notice tasking to Northern California for the difficult and demanding salvage of a downed USAFR HC-130 that had crashed in November 1996. Initially, SAFEGUARD was to assist Deep Submergence Unit (DSU) of Commander, Submarine Development Group One in the recovery of the aircraft's tail section which contained the voice and data recorders. Prior to SAFEGUARD's arrival, DSU's remotely operated vehicle, "Scorpio", began to develop mechanical difficulties which were beyond onsite repair. At the request of the Air Force, NAVSEA contracted Oceaneering to embark the ROV Deep Drone in SAFEGUARD and conduct the recovery operations. Through extremely rough weather and long hours, SAFEGUARD was able to recover both the voice and data recorders, one of the aircraft's engines and facilitate locating and videoing the large debris field. For this difficult and complex operation SAFEGUARD received Bravo Zulus from both the Secretaries of the Navy and Air Force. After this successful operation, SAFEGUARD returned to Pearl Harbor to complete a compressed Pre Overseas Movement (POM) period.

During the POM period SAFEGUARD completed an aggressive Maintenance Availability with Intermediate Maintenance Activity, Pearl Harbor. Additionally, SAFEGUARD conducted full deployment briefings for families and crew and held a well attended picnic for families and crew prior to the April Deployment.

SAFEGUARD deployed 14 April enroute Apra Harbor, Guam. While in Guam, SAFEGUARD received message traffic canceling scheduled operations in the Persian Gulf. New tasking had SAFEGUARD participate in Specwar SUBEX 97-3 where SAFEGUARD was responsible for managing surface contacts and providing an onsite recompression chamber while members from SEAL teams exercised with USS KAMEHAMEHA (SSN 642). SAFEGUARD also participated in demonstrations of small unit tactics with SEAL personnel for Commander in Chief U. S. Special Operations Command. The ship then transited to Kota Kinabalu, Malaysia for a port visit. SAFEGUARD's next port was Singapore.

While in Singapore SAFEGUARD completed a short maintenance period and made final preparations for Cooperation Afloat Readiness and Training 97 (CARAT 97). The first CARAT exercise was with Thailand.

August was USN-ROKN SALVEX 97-2k. SAFEGUARD trained with Korean divers and sailors in salvage and mixed gas diving. SAFEGUARD departed South Korea on 5 Sep for Pearl Harbor.

SAFEGUARD returned to Pearl Harbor on 20 Sep. A post-deployment standown followed. A highly successful Mid Cycle Assessment was conducted and a Diving Safety Survey were conducted in November both inspections scored "satisfactory". SAFEGUARD also was awarded the CNO Surface Ship Safety Award for competitive cycle 1996. A Navigation Checkride and the Junior Officer Shiphandling was conducted on 10 December. Holiday leave and upkeep started 15 December.
