Subj: 1982 Command History; submission of OPNAV Report 5750-1

1. (U) Command Organization

a. 1982 - The basic mission of the squadron has remained the same as stated on the VF-14 Watch and Information Sheet and that is "to intercept and destroy enemy aircraft and anti-ship cruise missiles in all weather conditions and to establish and maintain local air superiority". Historically, a fighter squadron is tasked with opposing enemy aircraft. However, with the threat of potent long range missiles in the enemy arsenal, the multi-track and ECM capabilities of the F-14A/AWG-9 Phoenix Weapons System have received added importance. Consequently, the Maritime Air Superiority role of the TOMCAT and its crew has received added emphasis. During 1982, VF-14 has continued to train for the varied array of enemy threats.

b. The Command organization has remained consistent during the calendar year. Enclosure (5) presents a command structure as it existed through 1982 and lists the officers who held squadron billets at the close of the calendar year. Enclosures (3) and (4) provide a brief biography of the present Commanding Officer and the Executive Officer.

2. (C) Summary of Operations

Calendar Year 1982 was an exciting and successful year for the TOPHATTERS. After a relaxing and well deserved holiday stand down, preparations for the June cruise resumed. On 20 January, the TOPHATTERS embarked in USS INDEPENDENCE (CV-62) for refresher training. This marked the first time "Indy" had ever worked two squadrons of F-14 aircraft on her flight deck.

After nearly a month of flight operations, the TOPHATTERS returned to NAS Oceana on 24 February. There ensued a three week stand down which was used to further prepare the aircrews for the arduous carrier flight operations they would encounter during TYT II, III, and the ORE. Many hours were spent flying FCLP's, both day and night, and the maintenance department worked hard to prepare the aircraft for the grueling rigors ahead. The end result was an outstanding state of readiness of the aircrew and their planes during TYT II, III, and the ORE.

The TOPHATTERS embarked in the "Indy" on 17 March. After 16 days of flight operations, the TOPHATTERS arrived inport Ft. Lauderdale, FL for a well deserved port call from 3 to 6 April. "Indy" then set sail to continue the training with TYT III. The pace increased substantially in order to prepare the ship and Airwing team for the ORE, which ran from 15 to 18 April, as was evidenced by their receiving the grade of Low Outstanding for their performance in ORE.

DECLASSIFIED

122 FEB 1983

This was followed by the TOPHATTERS participation in the fleet defense exercise named "Mobile Sea Range". On 23 April, "Indy" arrived in port St. Thomas, V.I. and the TOPHATTERS made good their three day port call. For the next two weeks, the TOPHATTERS participated in the multi-service exercise "Ocean Venture 82". On 10 May, the TOPHATTERS returned to NAS Oceana for their four week pre-cruise stand down.

On 7 June the TOPHATTERS embarked in "Indy" and commenced a six and one half month deployment. "Indy" inchooped to the Mediterranean on 19 June and following a two day turnover with the USS JOHN F. KENNEDY (CV-67), the TOPHATTERS began normal flight operations. From 24 to 28 June, the squadron participated in exercise "Daily Double", a multi-national exercise in which several ACM hops were flown against Italian fighters.

The majority of the Mediterranean deployment was spent in MODLOC, 70 miles off the coast of Beirut, Lebanon in support of U.S. Marine Peace-Keeping Forces ashore. The highlight of the cruise was "Indy's" four day port call to Athens, Greece from 24 to 28 October. After that, it was back to "Bage1 Station" until, on 6 December, Indy turned over Bage1 Station to USS NIMITZ (CV-68). After flying over 2,579 hours and 1331 sorties, the TOPHATTERS arrived in port Rota, Spain on 11 December 1982 for a one day stopover to pick up the dependents of Indy's crew and Airwing for a "Tiger Cruise." On 12 December, Indy was ready for the big run across the Atlantic to Norfolk. The transit took 10 days and despite rough weather, the TOPHATTER dependents really enjoyed the time spent with their Dads' and the opportunity to learn what his job was all about.

On 21 December, the TOPHATTER aircrews lead by Commander Ed Andrews, COMCARAIRWING SIX and Commander Alex C. Rucker, Commanding Officer of the TOPHATTERS, launched off Indy's flight deck one more time and flew into NAS Oceana in full formation to the anxiously waiting families and friends. The following morning, 22 December, Indy tied up alongside Pier 7, Norfolk Naval Base and the remaining officers and men of Fighter Squadron FOURTEEN enjoyed the type of homecoming men have always received upon return from a long deployment. After a muster on the morning of the 23rd, the TOPHATTERS joined their families and spent the remainder of the year enjoying the post-cruise stand down as well as a very memorable Christmas season.
