1. Purpose. To provide statistical information concerning the Naval Aeronautical Organization (NAO). NAO forecast primarily contains the current base loading of the aeronautical shore activities of the naval establishment. NAO forecast is published annually and contains information corrected to 1 October of each year.

2. Corrections. Addressees responsible for the information in various sections of this publication are requested to notify the Chief of Naval Operations (CNO) N881C3 of any errors or omissions. In particular, commanding officers of each station are requested to review the command and support relationships and base loading figures pertaining to the station. A revised edition of that portion, reflecting the 1 October 1997 situation, should be forwarded to CNO by 1 September 1997, in the format of enclosure (1). When changes are minor in nature, it is requested that the updated report be carefully and legibly updated by pen changes.

3. Classification. Reference (a) downgraded the information contained in this notice to unclassified.

4. Report. Report Symbol OPNAV 5400-3 is assigned to this report.

5. Distribution. In the interest of reducing publication costs, addressees are requested to review distribution for reduction and inform CNO N881C3 if subsequent editions are not required.

6. Cancellation Contingency. This notice will be cancelled upon receipt of the next edition of the Naval Aeronautical Organization.

## STATION LISTING FORMAT

The below example covers the majority of units/activities which may be aboard a base or station of the naval aeronautical shore establishment. Not all categories are applicable and station commanders need only list those categories which pertain. Use on board counts. Unique situations affecting base support requirements may be listed at the station commander's discretion. For the purposes of these reports, "naval activities" denote both Navy and USMC units. When changes are minor in nature, it is requested that the updated report be carefully and legibly updated by pen and ink changes. SUBMISSION OF THE 1 OCTOBER 1995 UPDATES TO THIS DOCUMENT WILL CONFORM TO THE FORMAT OF THE EXAMPLE STATION LISTING SET FORTH BELOW.

NOTE 1/ Where a subordinate unit and its parent unit are listed aboard the same station, each unit (subordinate or parent) will report only personnel assigned to its respective unite.

NOTE 2/ In any category, if an activity conducts student training, under that category state the average number of students by type (officer/enlisted) and service (USN/R or USMC/R).

## DEFINITION OF TERMS AND AIDS TO UNDERSTANDING THIS BOOK

The planned Naval Aviation Shore Establishment, including Marine activities, for 1 October 1995 is reflected in the assigned missions of individual activities. These missions are promulgated and revised by the OPNAV Notice 5400 series. As directed by OPNAV Instruction 5450.171, it is the responsibility of Echelon 2 Commanders to promulgate functions and tasks for each activity under their command in support of the assigned mission. NAVAIR Instruction series 5451 contains a list of approved tasks for each activity under Naval Air Systems Command. Permanent duty stations of Naval units are contained in the effective edition of OPNAV Instruction 3111.14.

AIRCRAFT ON BOARD STATIONS

Base aircraft data contained in this Notice reflect an on board (including home base deployed) count as of the date of the covering letter 1 October. On board estimates are submitted by air stations and facilities a month or two in advance.

NAVY MANPOWER ALLOCATION

Tables on pages 5-10 of this publication include a Fiscal 1995 summary of the personnel allocations for aviation activities as of 1 October 1995. Personnel figures shown for the individual stations and activities reflect an estimated on board count as of 1 October 1995. Estimates are prepared within a month or two of the 1 October date.

Personnel data for USNR/USMCR squadrons/units represent numbers allowed in drill pay status. Active duty personnel (TARS and USN) associated with Reserve activities are shown separately.

COMMAND OVER SHORE ACTIVITIES

The exercise of command over a shore (field) activity has as its primary purpose the provision of effective support to the forces of the United States Navy and of the United States Marine Corps. It encompasses over-all authority, direction, control, and coordination necessary to carry out the assigned mission, and responsibility for the operating efficiency of the activity. It includes authority and responsibility for mission planning, shore activity planning and workload planning. It also includes authority and responsibility for coordinating the application of the various elements of support. Mission and facilities planning for shore (field) activities shall be accomplished with the guidance and assistance of commands, bureaus and offices assigned support responsibilities, and with the technical advice of other commands, bureaus and offices. Administrative and technical guidance shall include:

- a. The establishment of standards and procedures for specialized administrative or technical functions:
- b. Professional and technical advice, guidance, and assistance;
- c. Performance of specialized administrative or technical functions as a service.

Supervision by Staff Assistants over assigned shore (field) activities encompasses the same degree of authority and responsibility as command. (SECNAVINST 5400.14A)

## DEFINITION OF TERMS AND AIDS TO UNDERSTANDING THIS BOOK (Continued)

TECHNICAL SUPPORT TO COMMANDS AND ACTIVITIES

Technical support is a term denoting the responsibility of various systems commands, bureaus and offices within the Navy to provide resources to a command or activity of the Navy or Marine Corps to enable it to carry out its mission. It includes administrative, personnel and material support, guidance and assistance in and evaluation of such matters as organization, procedures, budgeting, accounting, staffing and the utilization of personnel funds, material and facilities. In addition, technical support includes the responsibility to assist command in evaluating the operating efficiency of activities.  
(SECNAVINST 5400.14A)

TYPES OF NAVAL AIR STATIONSNAVAL AIR STATION

An independent activity that provides aircraft operating, maintenance, training and personnel facilities in accordance with organization requirements.

NAVAL STATION

A shore activity capable of performing general functions, usually in direct support of the operating forces.

MARINE CORPS AIR STATION

An independent aviation activity developed to provide permanent facilities for a war strength Marine Aircraft Wing and station forces, less the units deployed at subordinate Marine Corps Air Facilities and any Marine Corps Auxiliary Landing Field. A Marine Corps Air Station possesses facilities for maintenance work beyond the scope of the capabilities of the dependent fields. It acts as the supply stock point as designated for the subordinate airfields and air facilities to be supported and budgets and manages the funds for maintenance and operations for all assigned subordinate airfields and is under the command of the appropriate Commander, Marine Corps Air Bases.

NAVAL AIR FACILITY

An activity established to meet some special requirement of naval aviation. It may or may not be administratively dependent on a parent (air or non-air) activity, in accordance with organizational requirements.

AUXILIARY LANDING FIELD

An airfield having limited facilities, additional to the landing area in operation. It is designated as such by the Chief of Naval Operations to provide an airfield which can serve as: a staging base for gunnery, ordnance, or other training exercises; a mirror or other landing practice site; or emergency or "Bingo" field in support of off-shore carrier operations, and/or a base, with limited support, for assigned aircraft or units. The facilities and/or services may include any or all of the following as appropriate to usage and/or user requirements: air traffic control, communications, fire and crash rescue services, personnel berthing and messing, refueling and rearming equipment, read issue stowage, line operations, lime maintenance, high usage line maintenance spare parts and limited support of assigned aircraft or units. An ALF is not a

AUXILIARY LANDING FIELD (Continued)

separately established activity but is under the cognizance of a nearby parent (air or non-air) activity from which personnel, material and funds for its support are allocated. The parent activity may maintain a caretaker detachment and/or service unit at the ALF for day-to-day operations.

OUTLYING LANDING FIELD (HELICOPTER OUTLYING LANDING FIELD (H) OLF)

An air field having no established facilities in operation except a landing area. It is designated as such by the Chief of Naval Operations to provide a landing area on which aircraft based elsewhere can conduct landing practice or other exercises. An OLF is not a separately established activity but is under the cognizance of a nearby parent air station from which personnel, material and funds for its support are allocated. No personnel are permanently based at an OLF. However, required air traffic control and/or crash rescue personnel, or others appropriate to support the operations to be conducted, along with mobile facilities as required to supplement existing facilities, may be located at the OLF either on a "duration of the operation" or a "normal operating hours" basis.

THE STATUS OF NAVAL AIR ACTIVITIES

SOURCE: OPNAVINST 5450.169D 20 Apr 1982

ACTIVE

Development. An non-operating condition during the constriction of preparation period.

Fully Operational. Adequate personnel and facilities to support the assigned mission and planned operations.

Maintenance. Minimum personnel and facilities to support emergency or intermittent operations and maintenance of equipment in an operating or preserved condition. Additional personnel will achieve fully operational status.

Partial Maintenance. Minimum personnel for security, fire protection and maintenance. Maintains minimum facilities and utilities essential for occasional use by operating forces in an operable or preserved condition. Operating units provide additional personnel and equipment necessary during such use.

INACTIVE

Mobilization. This designation identifies real property of a non-operating shore activity retained for mobilization purposes. The major claimant who establishes the requirement for the "mobilization" designation is responsible for physical security, fire protection, and static maintenance (timely correction of defects conducive to accelerated deterioration).

Excess. This designation identifies real property of a shore activity being processed as excess to the needs of the Navy. The major claimant to whom the "excess" shore activity was assigned when active is responsible for physical security, fire protection and static maintenance until final disposal of the real property. The major claimant is also required to advise the CNO N09B22F of final disposal of the real property. CNO N09B22F will then modify Section 4 of the SNDL CAT.

## NAVY MANPOWER AUTHORIZATIONS

The total Military Manpower Authorizations, excluding USMC, for Fiscal Year 1995 requires end year strength of 424,179. NAVAL AEROSPACE AND OPERATIONAL MEDICAL INSTITUTE

NAVAL AEROSPACE AND OPERATIONAL MEDICAL INSTITUTE Continued)

Program: II. Professional Services (Continued)

The Command also performs annual and special examinations for retirement, separation, discharge, reenlistment, post-hospitalization, post-Medical Board, and fitness to continue flying of other aviation military personnel stationed at NAS Pensacola and as required by the Bureau of Medicine & Surgery regulations or as directed by higher authority. In addition, the Command provides the following special services: performs annual aviation physical examinations for Army Reserve and Air Force Reserve aviation personnel, Coast Guard and Foreign Flight Students stationed in the surrounding area and provides professional and clerical assistance necessary to process cases referred to the Special Board of Flight Surgeons. Finally, this Command maintains the Aerospace Advisory Council, a focus of aeromedically trained, operationally experienced, clinical specialists for consultative support and review of programs, problems, and instructions in matters of Aerospace medicine to higher authority.

Program: III. Aerospace Physical Qualifications Directorate. This directorate is responsible for review of all applicants for all aviation programs for both Navy and Marine Corps personnel. In the case of personnel who are determined to be not physically qualified for flight duties, the directorate makes waiver recommendations to the Bureau Naval Personnel, Commandant of the Marine Corps or the Navy Recruiting Command as appropriate. Close liaison is maintained with the Office of the Chief of Naval Operations; Chief, Bureau Naval Personnel; The Commandant of the Marine Corps and the Commander, Navy Recruiting Command in matters relative to the physical qualification of aviation personnel. Microfilm records are maintained on all aviation designated personnel as well as all applicants to aviation programs. The directorate is also responsible for the maintenance and updating of the aviation medicine research computer database. Telephone and written consultative support is provided to aviation medicine practitioners world wide.

Program: IV. Repatriated Prisoner of War Program. On 1 October 1980, with the decommissioning of the Center for Prisoners of War Study, the Command assumed responsibility for the follow-up of former Navy and Marine Corps Vietnam Prisoners of War. This ongoing program monitors the long term fitness and health of these men and is accumulating data for scientific analysis. The NAMI program is also unique in that 138 of the 186 Naval Aviators has a matched comparison group partner who was not a Prisoner of War. In January 1994 the Air Force funded their Vietnam RPOWS to come to NAMI to participate in the 20th year of repatriation follow-up. This brings the number of participants in the follow-up study to almost 500. Participants receive a comprehensive physical examination and psychiatric screening and are referred for follow-up care as appropriate.

Program: V. Iranian Hostage Program. In September 1981, the Command assumed responsibility for follow-up examinations of U.S. Personnel taken hostage when the U.S. Embassy overrun. The follow up study is conducted in the same format as the Prisoner of War follow-up and is intended to evaluate the long term effects of captivity and torture on health and longevity.

Program: VI. Desert Storm Prisoner of War Program. In March 1991, the Command participated in planning and execution of the medical repatriation process of 21 U.S. Servicemen held as prisoners in Iraq. These personnel have been in the POW follow-up study and will be evaluated appropriately.

Operational Psychology Department

The Operational Psychology Department is responsible for promoting the operational effectiveness and safety of Fleet, and Fleet Marine Force activities. Support is provided through management, education, training, consultation, and studies and analyses in seven major areas: human factors, biostatistics, psychometrics, modeling, selection and testing, training and human performance.

Specifically, the Department performs biostatistical and psychometric analyses in support of personnel selection, epidemiological studies, and other medical and fleet programs; for managing the testing and selection programs for aviation, Landing Craft Air Cushion Vehicle (LCAC), officer procurement, and the Seaman to Admiral program; maintenance and management of the Aviation Selection and LCAC Data Bank, Flight Student and Criterion Data Bank, and the Minorities Data Bank; and performs ongoing performance prediction studies to ensure the continual validity of the various selection tests.

Moreover, the Department provides direction support to the operational forces. It utilizes existing data banks for various projects including analyses of epidemiologic data, Repatriated Prisoner of War (RPOW) data, and other medical and fleet requested studies and analyses. It provides human factors professional and technical support and consultative services for operationally related Fleet and Fleet Marine force problems addressing tasks and environmental factors affecting on-the-job performance, safety, and job design; conducts human factors education and training for both medical and fleet personnel, and serves as a link to the research and development (R&D) community in identifying both fleet and medical R&D requirements. ## NAVAL AEROSPACE MEDICAL RESEARCH LABORATORY

### NAVAL AEROSPACE MEDICAL RESEARCH LABORATORY

Location: Naval Aerospace Medical Research Laboratory (NAMRL) is located on Naval Air Station, Pensacola, Florida, and is a component of the Naval Medical Research and Development Command, National Naval Medical Center, Bethesda, Maryland.

Mission: The Laboratory's mission is to conduct research, development, test, and evaluation in aviation medicine and the allied sciences to enhance the health, safety, and readiness of Navy and Marine Corps personnel in the effective performance of peacetime and contingency missions.

Program: I. Research. The Laboratory's programs emphasize research in biomedical systems and standards, spatial orientation, and aviation medicine. State-of-the-art facilities are available for auditory, visual, vestibular, psychopharmacological, cognitive, and thermal-stress research. The Laboratory maintains three operational mobile field laboratories, the world's finest collection of man-rated acceleration research devices, and an innovative technology-transfer program. World renown scientists have been supporting fleet operations, aircrew selection, mission effectiveness, and aircraft design for over five decades and have authored more than 2000 scientific publications in that time. A major focus is the definition and elimination of health hazards in operational environments (including motion, noise, fatigue, sensory restriction, and thermal effects). Improved design specifications for aircraft, weapons systems, and protective systems represent another major product line. The Laboratory's research is greatly facilitated by the local availability of a large population of aviation trainees from Chief of Naval Education and Training, Chief of Naval Air Training, and Marine Aviation Training Support Group who serve as volunteer research subjects.

II. Special projects. The Laboratory maintains close liaison with and provides consultative services to other Department of Defense (DOD) laboratories and commands, the Department of Transportation, the National Aeronautics and Space Administration, and other governmental agencies. The Laboratory is a member of the Triservice Aeromedical Research Panel, which facilitates interservice cooperative work, the Interlaboratory Committee and Editing and Publishing, and the Scientific and Technical Information Program. It also participates in the NATO Advisory Group for Aerospace Research and Development, the Air Standardization Coordinating Committee Working Party 61, the DOD Human Factors Engineering Technical Group, the U.S. Air Force Academy Conference on The Applied Behavioral Sciences, and the Military Testing Association. Current projects focus on end products such as specialized devices for training visual scan patterns in aviators, fatigue countermeasures for use in sustained operations, vestibular performance test batteries for aviators, improved acoustic devices, computerized aviation-selection test batteries, and training kits for night vision. Other topics currently under investigation include spatial orientation, motion sickness, virtual environments, and G-tolerance (emphasizing sensorimotor and perceptual consequences). Data collection in operational environments is augmented by three mobile field laboratories: a night-vision laboratory, which also functions as a mobile night-vision training classroom; a spatial orientation trailer, which has been deployed to investigate human responses to visually and motion-induced vestibular stimuli in operational settings; and an aviation medicine trailer, which has been deployed to support research into aviation anthropometrics.

## NAVAL METEOROLOGY AND OCEANOGRAPHY COMMAND

### 1. Fleet Numerical Meteorology and Oceanography Center (Command - COMNAVMETOCCOM)

**Mission:** To provide operational numerical meteorology and oceanography (METOC) products and services to the Department of Defense; and to develop and test numerical techniques to enhance METOC and analytical and forecasting capabilities as directed by COMNAVMETOCCOM.

The Fleet Numerical Meteorology and Oceanography Center (FLENUMMETOCCEN) in Monterey, CA is the Naval Meteorology and Oceanography Command's processing center dedicated to running state-of-the-art, operational global and high resolution regional atmospheric and oceanographic analysis and forecast models.

Through linkage with DoD and NOAA environmental satellite data distribution systems, FLENUMMETOCCEN acquires global coverage of environmental data. Numerically generated METOC products are made available for distribution on Navy and joint command, control, communications, computers and intelligence (C4I) systems via the Navy Regional METOC Centers which additionally produce products and services tailored to specific military operations or exercises. The Navy Oceanographic Data Distribution System (NODDS) permits worldwide, dial-in access to FLENUMMETOCCEN products. NODDS technology and access to unclassified FLENUMMETOCCEN products is provided to NOAA for use in the civil sector under a recently signed Annex to the NAVY-NOAA Memorandum of Agreement (MOA).

FLENUMMETOCCEN is uniquely capable of providing high resolution meteorological products on short notice, for any location, worldwide, in support of contingency military and humanitarian operations. Products available from FLENUMMETOCCEN include atmospheric and oceanographic observations, data extracts, and analysis and forecast fields of METOC parameters required to support joint military operations.

### 2. Naval Oceanographic Office (Command - COMNAVMETOCCOM)

**Mission:** To conduct multidisciplinary ocean surveys and assigned scientific and technical programs with resultant products directed toward satisfying U.S. Navy and DoD oceanographic needs for effective weapon and sensor system performance and safe and accurate navigation.

The Naval oceanographic Office (NAVOCEANO), located at Stennis Space Center, MS is the Naval Meteorology and Oceanography Command's center responsible for collecting, processing, and distributing hydrographic, oceanographic and other geophysical data and derivative products. This mission is in response to long term national and strategic requirements as well as emergent, short term requirements in support of contingency operations. To accomplish this, NAVOCEANO has a fleet of eight survey ships, a sophisticated satellite and ocean buoy processing facility, and access to oceanographic survey aircraft. NAVOCEANO's Warfighting Support Center, using the large scale computer facility at NAVOCEANO, operates interactive ocean models for littoral (coastal) regions and special automated ocean models which may be required on a non-routine basis such as ocean drift or oil spill models. Products available from NAVOCEANO include ocean fronts and eddies analyses, and surface and three-dimensional ocean thermal fields which are distributed through the Navy Regional METOC Centers via joint and Navy C4I systems. As a node on the Special Operations Command Research, Analysis, Threat Evaluation System (SOCRATES), NAVOCEANO provides products in support of special operations in the littoral regions. NAVOCEANO is also the Navy's primary NOAA TIROS data processing facility.

### 3. Naval (Regional) Meteorology and Oceanography Centers (Command - COMNAVMETOCCOM)

**Mission:** To provide, within areas of responsibility, METOC products and services to the Armed Forces of the Department of the Defense as assigned by COMNAVMETOCCOM.

## NAVAL OCEANOGRAPHY COMMAND

### 3. Naval (Regional) Meteorology and Oceanography Centers (Command - COMNAVMETOCCOM)

(Continued)

The four regional Naval Meteorology and Oceanography Centers are hubs for the dissemination of METOC data; providing full spectrum meteorological and oceanographic services to Navy and joint forces operating within their respective area of responsibility. The Naval Pacific Meteorology and Oceanography Center (NAVPACMETOCCEN), Pearl Harbor, HI, assisted by its subordinate NAVPACMETOCCEN West, Guam, is responsible for the Pacific and Indian Oceans, Red Sea, and Persian Gulf areas. Additionally, NAVPACMETOCCEN West operates the Joint Typhoon Warning Center with the U.S. Air Force to provide tropical cyclone warnings to DoD and U.S. interests in the Western Pacific and Indian Oceans. The Naval Atlantic Meteorology and Oceanography Center, Norfolk, VA (NAVLANTMETOCCEN) is responsible for the Atlantic Ocean, and the Greenland, Norwegian, and Barents Seas; and the Naval European Meteorology and Oceanography Center, Rota, Spain (NAVEURMETOCCEN) for the Mediterranean, Black and Baltic Sea areas. Aligned with specific Navy Component Commanders, familiar with operations within theater, regional METOC centers manage and prioritize the dissemination of basic numerical METOC products from FLENUMMETOCCEN and NAVOCEANO, and add tailored services specifically focused on theater requirements. Products are transmitted to the operating forces via AUTODIN, the High Speed Fleet Broadcast, high frequency facsimile broadcasts, and via linkage to joint and Navy C4I systems. They provide global and high resolution theater analysis and forecast fields of METOC parameters required for shipboard and other deployed mobile METOC processing systems. Other products and services include depictions of significant weather, tropical cyclone advisories, high winds and seas warnings, ship route weather forecasts and routing, aviation forecasts, and a variety of special meteorological and oceanographic forecasts produced as needed to meet the situational requirements of the Navy and Joint Force Commander. In addition, they act as staging centers for the Navy Mobile Environmental Team (MET) services. Because of their intheater presence and focus, NAVMETOCCOM centers are ideally suited to serve as Joint Force METOC Forecast Units (JMFU) in support of theater joint operations.

### 4. Naval Ice Center - (Command - NAVOCEANO)

Mission: To provide, within areas of responsibility, METOC products and services to the Armed Forces of the Department of Defense as assigned by COMNAVMETOCCOM.

The Naval Ice Center, Suitland, MD (formerly the Naval Polar Oceanography Center) in cooperation with NOAA and the U.S. Coast Guard provides ice analysis and forecasting services to Department of Defense and allied activities either directly or through the regional NAVMETOCCOM centers.

5. Naval Atlantic Meteorology and Oceanography Facility Jacksonville (Command-NAVLANTMETOCCEN)  
Naval Pacific Meteorology and Oceanography Facility San Diego (Command - NAVPACMETOCCEN)  
Naval Pacific Meteorology and Oceanography Facility Yokosuka (Command - NAVPACMETOCCEN)  
Naval Training Meteorology and Oceanography Facility Pensacola (Command-NAVLANTMETOCCEN)

Mission: To provide, within area of responsibility, METOC products and services to the Armed Forces of the Department of Defense as assigned by COMNAVMETOCCOM.

The four Naval Meteorology and Oceanography Command Facilities at Jacksonville, FL; San Diego, CA; Pensacola, FL; and Yokosuka, Japan; provide limited area, local and aviation environmental forecast services, as well as services to aircraft, ship and submarine staffs. Meteorological forecast guidance from the regional oceanography centers and the Fleet Numerical Meteorology and Oceanography Center is used by all facilities. Those facilities located overseas augment this guidance with data from local sources.

## NAVAL OCEANOGRAPHY COMMAND

### 6. Naval Meteorology and Oceanography Detachment (Command - FLENUMMETOCCEN/

NAVLANTMETOCCEN/NAVPACMETOCCEN/NAVPACMETOCCENWEST/NAVEURMETOCCEN/  
NAVPACMETOCFACs/ NAVLANTMETOCFAC/NAVTRAMETOCFAC)

Mission: To provide, within local/functional areas of responsibility, METOC products and services as assigned by COMNAVMETOCCOM.

There are 42 Naval Meteorology and Oceanography Command Detachments located worldwide. Although primarily situated at Naval Air Stations, several are located at Naval Stations in support of seagoing units. Each detachment is established under an Officer or Chief Petty Officer in Charge, who reports to one of the Naval Meteorology and Oceanography regional centers or facilities. These detachments provide meteorological and oceanographic forecasting and warning services to Department of Defense and allied units within their local and functional areas of responsibility. Detachments within the contiguous states use the basic and applied meteorological numerical products from both the Fleet Numerical Meteorology and Oceanography Center and the National Meteorological Center in providing services. Overseas detachments use available foreign products in addition to Fleet Numerical Meteorology and Oceanography Center numerical products. Two detachments are oriented to provide specific technical services; one coordinates the Navy's climatological program, which is an element of the Federal Climate Complex at the National Climatic Data Center, Asheville, NC; the other involves circuit management of the Automated Weather Network (AWN) at Tinker AFB, OK.
