PART II

Narrative (Cont'd)

The period reported on was spent mainly in dive bombing and rocket training with all pilots looking forward to the change from SB2C-5 aircraft to the AD-1. Near the end of the period all pilots attended the AD-1 Mobile Training Unit. All pilots in the squadron who are expected to participate in the "shake down" cruise of the USS CORAL SEA were familiarized in the AD-1 aircraft and qualified in FCLP.

PART II

Narrative (Cont'd)

On 1 October 1947 Attack Squadron SIX BAKER reported aboard the U.S.S. CORAL SEA (CVB-43) for commissioning exercises at the Norfolk Naval Shipyard, Portsmouth, Virginia.

On the morning of 17 October 1947, Ensign [REDACTED], USNR pilot of AD-1 Bureau No. 09278 inadvertently landed wheels up at NAAS, Creeds Field, Virginia while making familiarization landings. Ensign [REDACTED] was not injured. The aircraft suffered class "C" material damage.

On the afternoon of 17 October 1947, Lieutenant (junior grade) [REDACTED], USN pilot of SB2C-5 Bureau No. 89434 stalled and ground looped on take off following a momentary cutting out of the engine. A small fire developed which was immediately extinguished by the crash crew. Neither the pilot or the passenger, [REDACTED], ACOM, USN were injured. The aircraft was a strike.

1 November 1947 to 1 December 1947

On 4 November 1947, Lieutenant [REDACTED], USN, flying AD-1 Bureau No. 09291 was rendezvousing after take off from NAAS, Creeds Field, Virginia when the manifold pressure dropped to about 10". He succeeded in returning to the field and touched down about half way down the runway. Severe application of the brakes was not quite sufficient to stop the aircraft and it nosed up gently in the grass about thirty (30) feet beyond the end of the runway. There was no injury to the pilot. Class "D" material damage was sustained by the aircraft.

On 12 November 1945, Ensign [REDACTED], USN pilot of SB2C-5 Bureau No. 89360 ditched his aircraft in Pokomoke Sound near bombing target No. 25 after experiencing engine failure at about 1000'. The pilot was able to turn cross wind before landing in heavy seas. Neither Ensign [REDACTED] nor the rear seat man, [REDACTED], AOML, USN were injured and both swam ashore safely. They were picked up and flown back to Norfolk by a PBY rescue plane. The SB2C-5 aircraft was a strike.

PART II

Narrative (Cont'd)

During the last week of this month all pilots attended air support school conducted by officers of the U. S. Army from Camp Pickett, Virginia.

1 December 1947 to 1 January 1948

Officers reported for duty - 0
Officers detached - 10
Enlisted men reported for duty - 26
Enlisted men transferred - 10

During the first two (2) weeks of December Air Group FIVE engaged in close air-ground support exercises in cooperation with units of the U. S. Army at the Blackstone Army Air Field Bombardment Area near Camp Pickett, Virginia. Glide bombing, rocket firing and straffing runs were made with live ammunition as directed by the Army observation and control unit.

During this training period the squadron began the adaptation of fighter type tactics to the AD-1 aircraft. This tactical revision was necessitated by the superior performance characteristics of the new AD-1 aircraft and the loss of the protection afforded by a rear seat gunner. During the latter part of the month flight operations were curtailed to a considerable extent by the absence of personnel on holiday leave and engaged in shipboard operations preparatory to embarkation of the Air Group for shakedown cruise in January 1948.
