VRC-40 2002 COMMAND HISTORY

1. Command Composition and Organization

a. Fleet Logistics Support Squadron FOUR ZERO, UICs 45592 and 09303, is assigned to the joint tasks of Carrier-Onboard-Delivery (COD) and Naval Special Warfare Support Service to the Navy's SECOND and FIFTH FLEETS. VRC-40 performs these missions in the C-2A(R) "Greyhound" Aircraft.

b. The Grumman C-2A carries the largest cargo payload of any fixed wing carrier aircraft and is the mainstay of the carrier battle group logistics support effort. The Greyhound's optimum fuel efficiency and range enable VRC-40 "Rawhides" to provide invaluable service to the vast SECOND and FIFTH FLEET operating areas. VRC-40 directly affects the combat readiness of every Atlantic Fleet Carrier Battle Group, supporting up to six carriers at any given time. The Rawhides have a unique operating environment. VRC-40 operates 365 days a year whenever and wherever an Atlantic Fleet Battle Group is underway. The Rawhides do not deploy as a unit: instead, a two-plane, self-sustaining detachment is assigned to each deploying carrier battle group. The detachment operates embarked and from land-based sites, providing the battle group with flexible and expeditious delivery of high priority personnel, mail, and cargo. VRC-40 also supports all Atlantic Fleet Carriers in routine SECOND Fleet exercises.

c. The homeport of VRC-40 is Naval Station, Norfolk, Virginia.

d. VRC-40's Immediate Superior in Command is Commander, Airborne Early Warning Wing, U.S. Atlantic Fleet (COMAEWWINGLANT), also located at Naval Station, Norfolk, Virginia.

e. The Commanding Officer from January 2002 to 31 December 2002 was Commander Andrew Alford.

7. General Contributions to the Logistics Community: The Rawhide Team continued to lead the community in service to the Fleet. In the past year, this squadron has delivered the needed parts, people and the beloved mail from home to the men and women who keep the Navy strong, all in record numbers. With the advent of Operation ENDURING FREEDOM, VRC-40 has seen an increase of almost 100 percent in the number of flight hours flown, with a 34 percent increase in the amount of passengers and cargo as compared to previous deployments in support of Operation SOUTHERN WATCH. The Rawhide Team has carried more, further, and all of it in support of Freedom.

VRC-40 continued to lead the VRC community in Aviation Safety by initiating a speed restriction to further the life of an aging airframe. Recognizing the shortfalls in current data regarding aircraft performance, this squadron is leading the charge in providing logistic support today and tomorrow. Providing the assets and data for emerging requests for test and evaluation, the Rawhide Team is continuing to improve the Greyhound for years to come.

Despite critical manning shortfalls, VRC-40 once again epitomized the philosophy of "working smarter, not harder." The demand for COD services increased substantially this year, and has become one of the most visible assets in the deploying Battle Groups. In light of this aspect, this squadron has worked diligently to maximize the utilization of deployed assets, and has re-organized its SORTS reporting requirements to provide up to date information to the highest levels of the military command structure.

Encl (1)

The Rawhide Team also saw an unprecedented level of foreign military interaction this year. Detachment Two, while operating in the North Arabian Gulf in support of Enduring Freedom, was able to complete multiple Touch & Go's on the *FS Charles de Gaulle*. This feat alone, along with establishing the feasibility of COD operations to a multi-national coalition Battle Group, demonstrated the opportunities for future logistics planners around the globe. Detachment Three, while also operating in the North Arabian Gulf, completed multiple missions in support of Operation Enduring Freedom to Pakistan, providing surge logistics to damaged, NMC aircraft from Carrier Air Wing Seven, returning needed assets from foreign airfields to the skies above our forces in Afghanistan. Detachment Four, while operating in the Mediterranean Sea, has seen service in multiple countries, including Morocco, Turkey, Spain, Hungary, Egypt, Turkey, as well as Italy and Greece.

In all, CY 2002 presented the RAWHIDE team with many challenges, of which, all were vigorously met with the positive "can do" attitude that exemplifies the squadron's resourcefulness and dedication to mission accomplishment.

10. CO's Remarks:

The Rawhides of VRC-40 have consistently excelled in the important role of supporting Atlantic Fleet carriers. As the continuing demands of Operation Enduring Freedom unfolded, VRC-40 responded to the increased tasking of the command authority with pride and determination. The extraordinary skill and resolute attitude of the men and women of VRC-40 were abundantly evident as the nation continued the war against terrorism. Logistics support became even more important as deployed aircraft carriers continued to support the Afghanistan campaign. Detachments Two and Three experienced a significant increase in their operational tempo. Their hard work and professionalism was evident in the unsurpassed logistics support of the USS ROOSEVELT and USS KENNEDY Battle Groups enabling them to maintain peak operational readiness and to deliver munitions on time and on target. There is simply no other logistics squadron in the Atlantic Fleet that more directly affects combat readiness. By rising to the diversity of challenges placed on them throughout CY 2002, the RAWHIDES kept the steady supply of high priority parts and essential people moving to the carriers and their Air

Encl (1)

Wings. VRC 40 achieved an astonishing sortie completion rate, even when heavily tasked supporting multiple CVN's engaged in national defense. Additionally, as a tool for public relations and power projection, RAWHIDE aircrews were the first and universally outstanding impression of the U.S. Navy to leaders and dignitaries throughout the world.

The exceptional morale and motivation of RAWHIDE Sailors manifested itself in the near flawless mission completion rates and remarkable appearance of its aircraft. This was a true testament to the men and women of VRC-40; truly front runners of the Navy, performing one of the most critical of all missions. The safe movement of our Sailors and distinguished visitors has to be, by its nature, a "zero defect" program, and the RAWHIDE professionals consistently succeeded in this endeavor. It's because of the sheer will and pride of the RAWHIDE team that the C-2A(R) aircraft, despite their age, are maintained to the highest standards of material condition and safety. Their extreme efforts and sacrifices merits the recognition as winners of the coveted 2002 Battle Efficiency award.

Subj: 2002 COMNAVAIRLANT BATTLE EFFICIENCY AWARD (CAT XV)
NOMINATION

1. It is my distinct pleasure to nominate Fleet Logistics Support Squadron FOUR ZERO (VRC-40) for the 2002 COMNAVAIRLANT Battle Efficiency (Category XV) Award.

2. The "Rawhides" of VRC-40 have once again distinguished themselves as the premiere component of Fleet logistics. In CY 2002, the "Rawhides" flew over 5300 flight hours, completed over 2700 sorties and recorded 1035 arrested landings. Fleet Logistics Support Squadron FOUR ZERO overcame critical manning shortfalls, countless challenges associated with flying an aging platform and doubled its carrier sorties to flawlessly meet logistic requirements, and keep naval Aviation combat ready.

3. The professionals of VRC-40 represent the finest in naval Aviation and are most deserving of the Battle "E" award recognition. The "Rawhides" have earned my strongest endorsement as COMNAVAIRLANT Battle Efficiency (Category XV) Award nominee.
