COMMANDER'S ASSESSMENT

USS CHINOOK (PC 9) plays a key role in maintaining the maritime security and supporting US strategic vision throughout the FIFTH FLEET Area of Operations. USS CHINOOK has maintain one of the highest operational readiness levels and accumulated the most underway periods of all FDNF PC's during the calendar year 2017. Her ability to provide a forward presence and defense in depth of key high value vessels and infrastructure while maintaining positive relationships with foreign Navies and merchants has been unmatched. Stability of the seas surrounding the middle-east is imperative and USS CHINOOK plays a key role in keeping the US a part of that stability with reliable, consistent and forward leaning mission planning and accomplishment. It has been my greatest pleasure serving with the distinguished men of USS CHINOOK (PC 9) and I look forward to an even better 2018.

CHRONOLOGY and NARRATIVE

USS CHINOOK (PC 9) **2017 HISTORICAL NARRATIVE**

USS CHINOOK (PC 9) has had a year marked by a successful Board of Inspection and Survey (INSURV) and multiple short and long operations throughout the Arabian Gulf and into the Gulf of Oman. CHINOOK began the year by completing her remaining Basic Phase events and preparing for INSURV. Immediately upon completion of INSURV, and turning over Commanding Officers, CHINOOK began a highly operational latter half of the year. These operations included Army Watercraft/Military Sealift Command escort operations, an inbound and outbound Strait of Hormuz transit, and EASTERN SAILOR, the largest Naval Exercise in Qatari history. Between operations, CHINOOK also completed four successful Continuous Maintenance Availabilities and comprehensive material readiness programs. The crew of CHINOOK takes pride in their training and successful completion of any

and all missions. We look forward to another successful year in 2018.
