4. Narrative:

Calendar year 2001 has been a challenging and rewarding year for "The One to Follow". CORMORANT is one of twelve Coastal Minehunter (MHC) class vessels in the U.S. Navy inventory. These ships are designed specifically for hunting sea mines. The MHC design integrates modern mine countermeasures technology with an exceptionally low magnetic and acoustic signature that allows the platform to operate safely in mined waters. The ship is 188 feet long, 36 feet at the beam, has a 12-foot draft and displaces approximately 960 tons. CORMORANT is outfitted with a state of the art SQQ-32 minehunting sonar and an AN/SLQ-48 Mine Neutralization Vehicle. The ship has a crew of 53, including 6 officers and 47 enlisted of which 18 are females.

The year 2001 started with CORMORANT finishing a holiday leave and stand down period until 10 January 2001. After stand down, the CORMORANT was underway to conduct the final phases of the Basic Phased Assessment, which was completed 2 February 2001 with a Final Evaluation Problem (FEP). Subsequently, CORMORANT was inport for an upkeep period until 17 February 2001 until participation in exercise RONEX 01-2 in the Panama City, Florida Area of Operations (PCOA). Upon exercise completion, the crew enjoyed a port visit in the city of Mobile, Alabama, for the annual Mardi Gras celebration. Next, CORMORANT was tasked with participation in exercise JTFEX 01-2 again in PCOA. She completed JTFEX on 22 March 2001 and headed back to Naval Station Ingleside. The next commitment was in support of Military Appreciation Week in Tampa Bay, FL. Exercises GOMEX 01-2 and MIREM 17 soon followed in the Gulf of Mexico from 8-21 June 2001. In the months of July and August 2001, CORMORANT conducted her Pre-Overseas Movement (POM) period prior to the start of Mine Warfare Readiness Group Four deployment window. On 21 September 2001, a change of command was conducted and the helm of CORMORANT was turned over by LCDR Steven Mucklow to LCDR Glenn Allen. On 20 October 2001, CORMORANT was tasked to support Exercise RONEX 02-1 with exercise mine lay

operations in the Corpus Christi Operations Area (CCOA). During this operation, CORMORANT was also tasked to search for and found a chirp sonar lost by a Naval research vessel in the Gulf of Mexico. Concurrently, an underway Naval Reserve drill weekend was held on board CORMORANT in support of the Naval Reserve Center, Corpus Christi. On 3 December 2001, CORMORANT participated in the exercise MIREM 19 and then prepared for an East Coast transit and departed on 31 December 2001.

Finishing the year in style, CORMORANT earned numerous unit and personal accolades during the Competitive Cycle 2001. The highlights were award of the Maritime Excellence, Command, Control and Communication excellence, Engineering Survivability and TYCOM Ship Safety awards. Additionally, USS CORMORANT was selected as the Commander, Mine Warfare Command (CMWC), At-Large Battle Efficiency winner. Individually, CORMORANT's Independent Duty Hospital Corpsman, HM1(SW/FMF) [REDACTED], USN, was selected as the CMWC Sea Sailor of the Year. HM1 [REDACTED] will compete for the CNSL Sailor of the Year in March 2002.
