4. Narrative. The following is a month-by-month narrative of calendar year 1994.

a. January. CURTS greeted the year conducting boarding operations in support of the U.S. blockade on Iraqi trade.

b. February. After a brief inport period at Jebal Ali, United Arabs Emirate, CURTS began the journey home to Yokosuka, Japan. On 12 February 94, CURTS discovered a vessel in distress in the North Arabian Gulf. MSV SHAHE AL HASAM #1205, carrying 23 passengers and 700 assorted goats and sheep, requested a tow to the nearest port in order to effect repairs on a cracked engine head. CURTS provided food and water to the passengers and crew and delivered the ship to the Omani Royal Police at Ras Al Hadd, Oman. CURTS then proceeded to Sembawang, Singapore for five days of rest and liberty before continuing home.

Subj: 1994 COMMAND HISTORY FOR USS CURTS (FFG 38)

c. March. CURTS got underway on 01 March 94 for Hong Kong. On 07 March 94, while moored to buoy A-50 in Hong King, LCDR B.D. Query assumed the duties of Executive Officer. CURTS shifted to Prince of Wales Barrack Pier in Hong King the next day. CURTS continued toward Yokosuka on 12 March 94, participating in an air power demonstration with USS INDEPENDENCE (CV 69) on 13 March 94. CURTS arrived inport Yokosuka, Japan on 17 March for a month-long leave and upkeep period.

d. April. CURTS took on ammunition in mid-April and got underway to Okinawa and Hong Kong in order to execute a torpedo evasion exercise, battle problem, and degaussing. This was CDR M.L. Moody's final underway period with the crew of USS CURTS; even as the ship sailed back into Yokosuka on 03 May 94, preparations were underway for a change of command ceremony.

e. May. On 13 May 94, CDR T.A. Delery relieved CDR M.L. Moody as Commanding Officer of CURTS. Change of command ceremony program is attached (enclosures 1). Ten days later, the new captain took CURTS underway to Chinhae, South Korea, and ultimately, Pearl Harbor, Hawaii for a joint warfare exercise called RIMPAC 94. Units of the U.S. Seventh and Third Fleets, as well as units of several allies' navies participated in the exercise.

f. June. While en route to Pearl Harbor, Hawaii, CURTS stopped to assist a commercial fishing vessel with an ill crew member on 14 June 94. After a night rescue in the Rigid Hull Inflatable Boat (RHIB), the ship's corpsman determined that the patient was suffering from appendicitis and required immediate hospitalization. CURTS helicoptered the sick man to USS INDEPENDENCE for treatment and further transportation. CURTS turned west toward Japan once again on 22 June 94 after a week inport Pearl Harbor.

g. July. CURTS returned to Yokosuka on 05 July 94. HSL-51 helicopter detachment departed the ship the following day. CURTS set sail two weeks later in order to participate in ASWEX 94-2K/SHAREM 107, a joint exercise with South Korean naval units. After a brief visit to Chinhae, South Korea, CURTS returned to sea on 24 July 94. On 29 July 94, a South Korean merchant vessel nearly collided with CURTS, but the collision was narrowly averted thanks to the alacrity of CURTS' crew.

h. August. CURTS put into Pusan, South Korea on 02 August 94 for two days of upkeep and liberty before returning to Yokosuka on 06 August 94. After a very successful Logistics Management Audit, conducted by the Navy Supply Corps, CURTS went back to sea on 18 August 94 for MISSILEX 94-4. CURTS fired a missile and a torpedo during the exercise, conducted two underway replenishments with USS INDEPENDENCE, and returned to Yokosuka on 27 August 94.

i. September. CURTS departed Yokosuka on 15 September 94 in order to participate in ASWEX 94-4JA/SHAREM 108. During this exercise, CURTS conducted anti-submarine drills, and also ensured interoperability between U.S. and Japanese assets through an underway replenishment with JDS SAGAMI

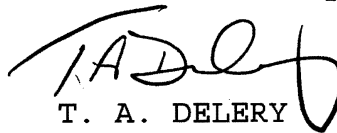

Subj: 1994 COMMAND HISTORY FOR USS CURTS (FFG 38)

and maneuvers with JDS SETAGIRI. CURTS arrived in Chinhae, South Korea and concluded the exercise on 28 September 94.

j. October. CURTS sailed south on 03 October 94 in order to participate in the commemoration of the 50th anniversary of the landing of U.S. forces at Leyte Gulf, Phillipines. CURTS anchored at San Pedro Bay, Leyte Gulf, Phillipines on 17 October 94, and returned to Yokosuka on 27 October 94.

k. November. The delay of a Selected Restricted Availability left CURTS' schedule in turmoil in November 94. CURTS spent the month in a leave and upkeep status.

l. December. CURTS deployed one last time on 09 December 94 in support of MISSILEX 95-1. The ship assisted in the exercise as a launch and recovery platform for missile test drone, as well as carrying members of the U.S. Air Force responsible for coordinating Air Force assets. CURTS tied up in Yokosuka on 17 December 94, and after a short ammunition offload, spent the holiday period in a leave and upkeep status.
