COMMAND COMPOSITION AND ORGANIZATION

Mission: USS ESSEX (LHD 2) is the second ship of the WASP (LHD 1) Class Multi-purpose Amphibious Assault ships. The mission is to conduct prompt, sustained operations at sea, primarily as the flag ship of an amphibious task group. USS ESSEX has the means to transport, deploy, command, and support all elements of a Marine landing force in an assault by air and amphibious craft.

USS ESSEX is specifically designed to operate Air Cushion Landing Craft (LCAC) for a waterborne assault, and to carry Harrier II (AV-8B) jump jets, for close air support of the assault force. USS ESSEX can accommodate the full range of Navy and Marine Corps helicopters, conventional landing craft and amphibious vehicles, along with all of the tanks, trucks, armored vehicles, artillery, ammunition, and supplies necessary to fully support an amphibious assault.

USS ESSEX is 844 feet long, with a beam of 106 feet. Two steam propulsion plants, capable of developing a combined 70,000 shaft horsepower, to give the 40,500 ton ship the ability to sustain speeds in excess of 20 knots. USS ESSEX has more than 22,000 square feet of vehicle storage space, and 100,000 cubic feet of cargo space. Living areas accommodate the 1099 crewmembers, and 1961 embarked troops and air crews. For combat support, as well as humanitarian missions, ESSEX has six fully equipped operating rooms, four dental operating rooms and hospital facilities capable of caring for 600 patients. When ESSEX is in her homeport of San Diego, Ca. she could readily become the largest hospital in San Diego county.
