Narrative

USS KITTY HAWK (CV 63), an aircraft carrier whose operational mission is to project power and provide forward presence in support of national policy, is currently homeported at Naval Air Station North Island, San Diego, CA.

KITTY HAWK's immediate operational and administrative senior in command in 1996 is Commander Cruiser-Destroyer Group FIVE (CCDG-5).

The beginning of 1996 saw KITTY HAWK inport at NAS North Island (NASNI), CA. CAPT Terry E. Magee was the Commanding Officer.

In preparation for KITTY HAWK's 1996-97 deployment to the Western Pacific, Indian Ocean and Arabian Gulf, the ship conducted numerous turnaround training workups and exercises. It began with at-sea periods for Tailored Ship Training Availability I/II and III; January 29-February 2 and February 21-March 1 respectively. During the week of March 20-27, KITTY HAWK returned to sea for Fleet Replacement Squadron Carrier Qualifications. Also during this time period, the Engineering Department received Engineering Limited Team Training. May 16 and ending on June 27, KITTY HAWK was at sea for Composite Training Unit, and Rim of the Pacific exercises 1996. During this at-sea period, Kitty Hawk received a visit from the Discovery Channel, who was on board to film a documentary. From July 14 through the 18th, the ship returned to sea again for Training Command Carrier Qualifications. The final workup started August 5 and ended August 19, when KITTY HAWK participated in Joint Task Force Exercise 96 off the coast of Southern California.

KITTY HAWK sailed from NASNI October 11 for the last time in 1996, beginning its eighteenth deployment. Embarked in KITTY HAWK was Commander, Carrier Air Wing ELEVEN (CVW-11). The squadrons and aircraft assigned to CVW-11 were: Helicopter Anti-Submarine Squadron 6 (HS-6), homeported at Naval Air Station North Island, San Diego, CA, flying the SH/HH-60F/H Sea Hawk; Logistics Support Squadron 30, Detachment 2 (VRC-30), homeported at Naval Air Station North Island, CA, flying the C-2 Greyhound; Fighter Squadron 213 (VF-213), homeported at Naval Air Station Miramar, CA, flying the F-14A Tomcat; Fighter-Attack Squadrons 22 and 94, flying the F/A-18C Hornet and Fighter-Attack Squadron 97, flying the F/A-18A, all from Naval Air Station Lemoore, CA; Sea Control Squadron 29 (VS-29), homeported at Naval Air Station

North Island, CA, flying the S-3B Viking; Aerial Reconnaissance Squadron 5 (VQ-5) Detachment B, homeported at Naval Air Station North Island, CA, flying the ES-3A Shadow; Airborne Early-Warning Squadron 117 (VAW-117), homeported at Naval Air Station Miramar, CA, flying the E-2C Group II Hawkeye; and Tactical Electronic Warfare Squadron 135, homeported at Naval Air Station Whidbey Island, WA, flying the EA-6B Prowler.

In conjunction with the *San Diego Union-Tribune*, KITTY HAWK developed the "Standing the Watch" grid coordinate map (See Supporting Documents) allowing family members, friends and other interested parties in the San Diego area the opportunity to follow ship's movement during deployment. Using letter and number coordinates on the map, the *Union-Tribune* printed the latest location of the KITTY HAWK Task Group and the USS ESSEX Ready Group on page B-2 of the Sunday, Tuesday and Friday issues of the newspaper as well as on the *Union-Tribune* Home Page on the Internet.

The following are grid coordinates of KITTY HAWK October 11-December 31, 1996:

While on deployment, KITTY HAWK made port visits to Hong Kong November 3-7; Singapore November 12-17; and Manama, Bahrain on December 24-28. The Manama port visit was a milestone as KITTY HAWK was only the second U.S. aircraft carrier to conduct a port visit there.

KITTY HAWK experienced many new additions on board in 1996 in regards to technological and quality of life items. As a part of the Supply Department's renovation of the *Hawk Shop* and *Luxury Store*, it added the "Create-A-Card" feature, "Sailor Phones," AT & T phone card and stamp machines September 15.

The Xerox DocuTech Network Publisher, an advanced printing system using digital technology, came about in keeping with the Navy's installation of networks and desktop publishing systems to replace older labor-intensive word processing systems. DocuTech was installed in the KITTY HAWK Print Shop in September. Its implementation provides for the first time the ability to print rate training manuals (RTM) and PQS manuals locally as well as to modernize the production of shipboard newspapers. KITTY HAWK is currently the only ship utilizing DocuTech to print RTMs and PQS manuals.

Also in preparation for deployment, as well as a means to improve communications both on board and ashore, a civilian contractor installed Challenge Athena III in October, a communications satellite system which provided the pivotal backbone for Sailor Phones, the Battle Force E-Mail System, a Video Teleconferencing System, and Video Information Exchange System.

In addition to the inspections and special qualifications performed at sea, KITTY HAWK underwent inspections and qualifications while ashore as well. On March 6, the Marine Detachment received a staff assist visit from various members of the Marine Corps Security Force Battalion. Later, the Marine Detachment completed annual rifle and pistol requalifications at Edson Range, Marine Corps Base Camp Pendleton, CA, April 8-12. Kitty Hawk received a 3M inspection April 29-May 2. The Weapons Department conducted a Shipboard Explosive Safety Inspection August 26-29.

In 1996, KITTY HAWK hosted a variety of distinguished visitors and dignitaries. Most noteworthy were the Honorable William Perry, Secretary of Defense, and Admiral Jay Johnson, Chief of Naval Operations, who visited KITTY HAWK to speak with the officers and crew. Dr. Perry visited on March 16 and Admiral Johnson on August 22. The two gentlemen made return visits upon KITTY HAWK's transit to the Arabian Gulf when Dr. Perry arrived on November 29 and Admiral Johnson on December 3.

Additionally, KITTY HAWK hosted the San Diego visit of the Honorable William Leftwich, Deputy Secretary of Defense for Equal Opportunity in which he toured the ship and discussed quality of life issues with local equal opportunity specialists on September 23.

In addition to hosting the KITTY HAWK Change of Command ceremony where Captain Steven J. Tomaszewski relieved Captain Terry E. Magee as Commanding Officer on July 31, various commands held their Changes of Command on board as well. On January 24, KITTY HAWK hosted the CNAP Change of Command ceremony. Vice Admiral Brent Bennitt relieved Vice Admiral Robert Spane, who retired. The ship was again the site of a Change of Command Ceremony, hosting the CCDG-5 Change of Command on May 10, where Rear Admiral Peter A.C. Long relieved Rear Admiral Thomas Marfiak. Later that month on the 14th, KITTY HAWK hosted the Carrier Air Wing ELEVEN Change of Command ceremony where Captain Robert J. Taylor relieved Captain Dennis M. Gillespie.

KITTY HAWK was also the site for special ceremonies and celebrations. The most recognized event was when KITTY HAWK celebrated the thirty-fifth anniversary of its commissioning on April 29. Another highly noteworthy event that attracted much attention was when CNAP held its awards ceremony on the flight deck on September 28. The awardees were members of VPB-146, a World War II-era patrol squadron, in which they received the Air Medal.
