14-16	DEC	Upkeep
17-19	DEC	Underway: Sea Trials
20-31	DEC	Upkeep

USS MOUNT WHITNEY (LCC/JCC 20)
COMMAND HISTORY NARRATIVE

Calendar year 2001 marked the 30th anniversary of active service for USS MOUNT WHITNEY, which was commissioned January 16, 1971. Despite its age, the joint communications ship continues to prove its seaworthiness year after year.

In April, USS MOUNT WHITNEY underwent a successful inspection by the Board of Inspection and Survey (INSURV) before participating in the first of two highly successful Joint Task Force Exercises (JTFEX). The second JTFEX took place August 10-17.

Both exercises saw MOUNT WHITNEY and the embarked Second Fleet staff get underway for two weeks, joining more than 24,000 U.S. joint service members as well as personnel and units from allied nations. The JTFEX replicated the emerging threats and operational challenges U.S. military forces may encounter around the world. The exercises provided the crew, staff and participating units with realistic, quality training to fully prepare our forces for joint operations when forward deployed. Participating forces used equipment and systems that incorporated the latest advances in technology.

While actively participating in these exercises, MOUNT WHITNEY's crew also got the chance for some well-deserved liberty during three port visits in 2001. The first came March 27-29 in Nassau, Bahamas, followed by Mayport, Florida, May 11-13, and Halifax, Nova Scotia on June 28-29.

The reigns of command changed hands on July 17, when CAPT David W. Prothero relieved CAPT Martin E. Jenkins III to become MOUNT WHITNEY's 18th Commanding Officer. Following a Systems and Engineering Material Assessment Team (SEMAT) visit in November, USS MOUNT WHITNEY closed out the year in the shipyards at NORSHIPCO in Norfolk, Virginia to make preparations for a very busy 2002.
