**Introduction.**

The first installment of records was transferred by the Fleet Development & Maintenance Division, Reserve Fleet Branch, in 1958. Its successor, Ships Material Readiness Division, Reserve Fleet Ships Branch, transferred a second installment of records in 1962. The collection is comprised of 13 feet of records relating to the Atlantic and Pacific Reserve Fleets. The collection is arranged into two sub-groups of records: Sub-Group 1 is the Records of CNO, DCNO (Logistics), Fleet Development & Maintenance Division, Reserve Fleet Branch (OP-432); and Sub-Group 2 is the Records of CNO, DCNO (Logistics), Ships Material Readiness Division, Reserve Fleet Ships Branch (OP-432). The bulk of the collection consists of files in Sub-Group 1 (ca. 12.5 feet). Files in Sub-Group 2 is comprised of ca. 5 feet of documentation. The collection covers the activities of the Reserve Fleets from 1947 through 1960.

**A Brief History of the Reserve Fleet Branch/Reserve Fleet Ships Branch (OP-432).**

According to the Office of the Chief of Naval Operations Organization Charts (Revised 30 May 1949), the organizational structure is **CNO, DCNO (Logistics), Fleet Maintenance Division, Reserve Fleets Branch (OP-439)**. The functions of the branch are: (1) Coordinates matters relating to the berthing, administration and maintenance of the Reserve Fleets; (2) Follows progress of the activation and inactivation of Reserve Fleet vessels and renders special reports as required by CNO; and (3) Reviews mobilization planning as it effects the Reserve Fleets.

According to CNO Directories for 1951 and 1952, the organizational structure is **CNO, DCNO (Logistics), Fleet Maintenance Division, Reserve Fleets Branch (OP-439)**.

In the February, May, and August 1953 Directories, there is a **Fleet Maintenance Division, Reserve Fleets Branch (OP-43R)**. In the November 1953 through May 1954 Directories, there is a **Fleet Maintenance Division** but no Reserve Fleets Branch. However, there is a **Reserve Fleet Coordinator (OP-43R)**.

In the June 1954 CNO Directory, the Fleet Maintenance Division becomes the **Fleet Development and Maintenance Division** and a **Reserve Fleet Coordinator (OP-43R)** is listed. This organizational structure is documented in the CNO Directories through December 1957.

In the March 1958 Directory the structure becomes **CNO, DCNO (Logistics), Fleet Development and Maintenance Division, Reserve Fleet Branch (OP-432)**.

According to the CNO Directories through March 1959, the organizational structure remains **CNO, DCNO (Logistics), Fleet Development and Maintenance Division, Reserve Fleet Branch (OP-432)**.

By the June 1959 CNO Directory, the organizational structure changes to **CNO, DCNO (Logistics), Ships Material Readiness Division, Reserve Fleet Ships Branch (OP-432)**.

According to the CNO Organization Manual (Change 17 approved 7 October 1960), the mission of Reserve Fleet Ships Branch is to insure that ships of the Reserve Fleets are maintained in the highest state of materiel readiness consistent with their probable utilization. The branch's functions include: (1) Handles policy matters which affect the materiel readiness of Reserve Fleet ships, and prepares the necessary directives incident thereto; (2) Reviews periodically the composition of the Reserve Fleets and the material condition of the ships assigned to determine the appropriateness of the retention of the various ships in the Reserve Fleet; (3) Provides guidance for the development of maintenance and improvement programs for Reserve Fleet ships in consonance with the availability of funds and personnel; (4) Coordinates matters concerning the care, preservation, maintenance, alterations, and modernization of ships and craft of the Reserve Fleets; (5) Coordinates matters concerning the administration and berthing of ships and craft of the Reserve Fleets; (6) Establishes policies for the activation of Reserve Fleet ships and craft, and the inactivation of ships and craft incident to their assignment to the Reserve Fleets; (7) Issues directives, as necessary, for the activation and transfer of Reserve Fleet ships; (8) Maintains timely data on the Reserve Fleets for planning, programming, and budgetary purposes, and on the mobilization capabilities of Reserve Fleet ships; (9) Expedites disposal action on unfit and excess ships and craft through initiation of action, overall coordination, maintenance of records, provision of follow-up information, and striking of these ships and craft from the Naval Vessel Register; (10) Maintains inventory and status records of the Reserve Fleet ships and stricken ships in Navy custody; (11) Prepares programs in support of approved plans for mobilization of Reserve Fleet ships, (12) Coordinates matters relating to intergroup dispersal planning; and (13) Prepares replies to congressional and public inquiries relative to Reserve Fleet matters.

### **Scope and Content Note.**

The collection, ca. 17.5 feet, is arranged by series and consists of official correspondence (dispatches, letters, and memoranda), files relating to the Atlantic Reserve Fleet and East Coast Groups, files relating to the Pacific Reserve Fleet and West Coast Groups, Activation and Inactivation Files, and Dispersal and Mobilization Files. In addition to this material, other documentation relating to the berthing, administration and maintenance of the Reserve Fleet includes Subject Files, Reserve Fleet general files, Material Inspection Reports, and OPNAV Notices and Instructions.

Groups of the Atlantic Reserve Fleet include Boston, Charleston, Florida, New London, New York, Norfolk, Philadelphia, and Texas. The Groups of the Pacific Reserve Fleet include Alameda, Bremerton, Columbia River, Long Beach, Mare Island, San Diego, San Francisco, Stockton, and Tacoma.

The collection was bulk declassified and is open to all researchers.
