MAJOR CONTINENTAL AND EXTRA-CONTINENTAL AVIATION SHORE ACTIVITIES

The planned Naval Aviation Shore Establishment, including Marine Activities, for the Fiscal Year 1961 is reflected in the assigned missions of individual activities. These missions are based on the Basic Naval Establishment Plan for Fiscal Year 1961 and may be modified as revised SECNAV NOTICES are issued. Assigned tasks to accomplish the listed mission are promulgated by BUWEPS NOTICES (Series 5451) which supersede the OPNAV NOTICES for each activity. The "units/activities to be supported" by individual activities are designated by the Chief of Naval Operations and will be listed in the appropriate BUWEPS NOTICE 5451 and as shown herein. Permanent duty stations of Naval units are contained in the effective edition of OPNAV INSTRUCTION 3114.14.

OLF

In the following tabulation of bases and satellite fields, an Outlying Field (OLF) is an airfield having no established facilities in operation except a landing area. It is designated as such by the Chief of Naval Operations in this document for the purpose of providing a landing area whereon aircraft based at established Naval air installations can conduct landing practice or other exercises which are best conducted away from the parent installations. An OLF is under the cognizance of a nearby parent air station to which are allocated minimum funds for the maintenance of the OLF. No personnel are based at an OLF.

ALF

An Auxiliary Landing Field (ALF) is an airfield having some facilities in operation in addition to a landing area. It is designated as such by the Chief of Naval Operations for the purpose of providing an airfield at which aircraft based at established Naval air installations can be refueled and/or rearmed for the conduct of gunnery practice. The facilities which are in operation, in addition to the landing area, may include several or all of the following: minimum personnel berthing and messing facilities, air traffic control, communication, crash and rescue, refueling or rearming equipment. An ALF is not a separate established Naval activity, and therefore is not listed in the "Catalog of Naval Activities." It is under the cognizance of a nearby parent air station to which are allocated minimum personnel, funds and equipment for its support. The parent air station may maintain a small caretaker detachment at an ALF.

AIRCRAFT

Aircraft assigned to activities are planned assignments, and will reflect normal types and numbers of aircraft based on a given activity. Aircraft and unit deployments can be determined from OPNAV NOTICE P03110 (Blue Book). Aircraft assigned to O&R facilities and BUWEPS aircraft storage pools are omitted and can be found in the Blue Book.

PERSONNEL

Personnel figures for Naval, Coast Guard, and Air Force units reflect beginning FY 1961 authorized billets. Numerical allowances for Marine Corps units are based on Tables of Organization for Fleet Marine Force units, and on Tables of Organization and/or Navy Manpower Authorization Allowances for Non-Fleet Marine Force Units.

Figures in parenthesis are shown for information only and are reflected in parent activity totals.

Personnel data for USNR/USMCR Squadrons/Units represent numbers allowed in drill pay status. Active duty personnel (TARS and USN) associated with Reserve activities are shown separately.

DECLASSIFIED

MAJOR CONTINENTAL AND EXTRA-CONTINENTAL AVIATION SHORE ACTIVITIES

MANAGEMENT CONTROL

The exercise of executive authority and responsibility for the performance of the mission, tasks, and work of shore activities. This responsibility includes mission planning, shore activity development and work load planning, internal organization and procedures, budgeting, accounting, staffing, and the utilization of personnel, funds, materials and facilities. Management control also includes responsibility for appropriate coordination and application of technical direction. (U. S. Navy Regulations 1948 Art. 0405)

MILITARY COMMAND

a. Objective, Responsibility, and Authority. Military command has as its objective the effective and efficient military operation and military administration of shore activities. Responsibility for, and authoritative direction over military operation and military administration are inherent in military command.

b. Military command is the exercise of authority and responsibility for shore activities for: (1) matters which are responsibilities of the Chief of Naval Operations, or as appropriate, the Commandant of the Marine Corps, such as operations, security, intelligence, discipline, naval communications and similar matters of naval operation and administration; (2) coordination of the efforts of shore activities as is necessary to insure that direct support and services are furnished to operating forces of the Navy and Marine Corps in a timely and effective manner; (3) continuous evaluation of the capabilities and readiness of requirements; and (4) matters related to the customs, traditions, and usage of the naval service. Military command includes also matters related to defense, and under conditions of emergency or disaster, when normal exercise of management control is impractical, shall include the power and duty to exercise authoritative direction as circumstances may require. The function of inspection and the responsibility for appropriate coordination are inherent in military command. (General Order 19, 21 May 1959)
