MAJOR CONTINENTAL AND EXTRA-CONTINENTAL AVIATION SHORE ACTIVITIES

The planned Naval Aviation Shore Establishment, including Marine Activities, for the Fiscal Year 1966 is reflected in the assigned missions of individual activities. These missions are promulgated and revised by SECNAV NOTICES. Assigned tasks to accomplish the listed mission are promulgated by BUWEPS NOTICES (Series 5451) which supersede the OPNAV NOTICES for each activity. The "units/activities to be supported" by individual activities are designated by the Chief of Naval Operations and will be listed in the appropriate BUWEPS NOTICE 5451 and as shown herein. Permanent duty stations of Naval units are contained in the effective edition of OPNAV INSTRUCTION 3111.14.

NAVAL AIR STATION

An independent activity that provides aircraft operating, maintenance, training, and personnel facilities in accordance with organizational requirements.

NAVAL AUXILIARY AIR STATION

An air installation that offers facilities similar to those provided by an air station and assists a parent air station in accordance with organizational requirements.

NAVAL STATION

A shore activity capable of performing general functions, usually in direct support of the operating forces.

MARINE CORPS AIR STATION

An independent aviation activity developed to provide permanent facilities for a war strength Marine Aircraft Wing and station forces, less the units deployed at subordinate Marine Corps Air Facilities and any Marine Corps Auxiliary Landing Field. A Marine Corps Air Station possesses facilities for maintenance work beyond the scope of the capabilities of the dependent fields. It acts as the supply stock point as designated for the subordinate airfields and air facilities to be supported and budgets and manages the funds for maintenance and operations for all assigned subordinate airfields and is under the command of the appropriate Commander, Marine Corps Air Bases.

NAVAL AIR FACILITY

An activity established to meet some special requirement of naval aviation. It may or may not be administratively dependent on a parent (air or nonair) activity, in accordance with organizational requirements.

AUXILIARY LANDING FIELD

An airfield having limited facilities, additional to the landing area in operation. It is designated as such by the Chief of Naval Operations to provide an airfield which can serve as: a staging base for gunnery, ordnance, or other training exercises; a mirror or other landing practice site; an emergency or "Bingo" field in support of off-shore carrier operations, and/or a base, with limited support, for assigned aircraft or units. The facilities and/or services may include any or all of the following as appropriate to usage and/or user requirements: air traffic control, communications, fire and crash rescue services, personnel berthing and messing, refueling and rearming equipment, ready issue stowage, line operations, line maintenance, high usage line maintenance spare parts and limited support of assigned aircraft or units. An ALF is not a separately established activity but is under the cognizance of a nearby parent air station from which personnel, materiel and funds for its support are allocated. The parent air station may maintain a caretaker detachment and/or service unit at the ALF for day-to-day operations.

OUTLYING FIELD (HELICOPTER OUTLYING FIELD (H)OLF)

An airfield having no established facilities in operation except a landing area. It is designated as such by the Chief of Naval Operations to provide a landing area on which aircraft based elsewhere can conduct landing practice or other exercises. An OLF is not a separately established activity but is under the cognizance of a nearby parent air station from which personnel, materiel and funds for its support are allocated. No personnel are permanently based at

MAJOR CONTINENTAL AND EXTRA-CONTINENTAL AVIATION SHORE ACTIVITIES

OUTLYING FIELD (HELICOPTER OUTLYING FIELD (H)OLF)(Continued)

an OLF. However, required air traffic control and/or crash rescue personnel, or others appropriate to support the operations to be conducted, along with mobile facilities as required to supplement existing facilities, may be located at the OLF either on a "duration of the operation" or a "normal operating hours" basis.

STATUS

DEVELOPMENT

A non-operating condition during the construction or preparation period of an activity, requiring sufficient personnel to plan and implement an organization adequate to place in service all facilities needed to support initial operations. The member of the executive administration of the Department of the Navy assigned command shall collaborate with the Chief of Naval Material in assigning the administrative responsibility of the officer in command or in charge during the transition to an "Active" status.

ACTIVE

Fully Operational. An operating condition requiring facilities and personnel adequate to support planned operations and to maintain equipment in an operating condition.

Maintenance. An operating condition requiring minimum facilities and personnel to support emergency and intermittent operations, and to maintain equipment in an operating or preserved condition such that, by addition of personnel, "Fully Operational" status will result.

Partial Maintenance. A condition less than "Maintenance," requiring minimum personnel for security and fire protection and for the maintenance in operable or preserved condition of those minimum facilities and utilities essential to permit occasional use by operating units when and if required. The additional supporting personnel and equipment required during such periods of use will be provided by the operating units concerned.

INACTIVE

Mobilization. A non-operating condition requiring physical protection of the property, personnel necessary for fire protection and periodic inspections by local representatives, to insure that defects which would lead to accelerated deterioration are promptly corrected in accordance with accepted practices for economical static maintenance. This designation will be used solely to identify real property which is being retained for mobilization purposes.

Excess. Same as Inactive-Mobilization, except that this designation will be used solely to identify real property which is being processed as excess to the needs of the Navy.

O&R CLASSIFICATION

- Class A Facilities are required for complete overhaul, repair, modification and test of aircraft, aircraft engines and all classes of aeronautical material.
- Class B Facilities are required for complete overhaul, repair, modification and test of aircraft engines and accessories, but only for essential repairs to aircraft. Aircraft will not be overhauled in these departments. Instrument overhaul facilities will be provided only when directed by BUWEPS.
- Class C Facilities are required for Maintenance only of aircraft and aircraft engines.
- Class D Facilities are required for operation only of aircraft.

AIRCRAFT

Summaries of aircraft allowances by type of organization and class of aircraft appear on preceding pages. Operating allowances, inventory and planned operating assignments by unit and model are published monthly in OPNAV NOTICE P03110 (Blue Book). Base aircraft data contained in this NOTICE reflect an on board (including home base deployed) count as of the date of the covering letter (1 January or 1 July). On board estimates are submitted by air stations and facilities a month or two in advance. Detailed accounting of aircraft in storage or undergoing rework at O&R facilities can be obtained from the Blue Book.

MAJOR CONTINENTAL AND EXTRA-CONTINENTAL AVIATION SHORE ACTIVITIES

PERSONNEL

Tables at the beginning of this publication include a Fiscal 1966 summary of the personnel allocations for aviation activities as of 30 June 1965. Personnel figures shown for the individual stations and activities reflect an estimated on board count as of 1 January 1966. Estimates are prepared within a month or two of the 1 January date.

Figures for the number of personnel in a subordinate unit are enclosed in parentheses in those cases where the parent activity is also listed aboard the station and the figures for the parent activity include the personnel in the subordinate unit.

Personnel data for USNR/USMCR squadrons/units represent numbers allowed in drill pay status. Active duty personnel (TARS and USN) associated with Reserve activities are shown separately.

COMMAND

The exercise of command over a shore (field) activity has as its primary purpose the provision of effective support to the forces of the United States Navy and of the United States Marine Corps. It encompasses over-all authority, direction, control and coordination necessary to carry out the assigned mission, and responsibility for the operating efficiency of the activity. It includes authority and responsibility for mission planning, shore activity planning and workload planning. It also includes authority and responsibility for coordinating the application of the various elements of support. Mission and facilities planning for shore (field) activities shall be accomplished with the guidance and assistance of bureaus and offices assigned support responsibilities, and with the technical advice of other bureaus and offices. Administrative and technical guidance shall include:

- (a) The establishment of standards and procedures for specialized administrative or technical functions;
- (b) Professional and technical advice, guidance and assistance;
- (c) Performance of specialized administrative or technical functions as a service.

Supervision by Staff Assistants over assigned shore (field) activities encompasses the same degree of authority and responsibility as command. (General Order 19, 1 January 1965)

SUPPORT

Support is the collective term given to the responsibility assigned to an official of the Department of the Navy to provide resources to a command or activity of the Navy or Marine Corps to enable it to carry out its mission. It includes administrative, personnel and material support, guidance and assistance in and evaluation of such matters as organization, procedures, budgeting, accounting, staffing and the utilization of personnel funds, material and facilities. In addition, support includes the responsibility to assist command in evaluating the operating efficiency of activities. A single official shall be charged with the primary support responsibility for each shore (field) activity. However, elements of material and other support may flow from an official not charged with the primary support responsibility. (General Order 19, 1 January 1965)

APPROACH SYSTEMS

GROUND CONTROLLED APPROACH (GCA) AND RADAR AIR

TRAFFIC CONTROL CENTER (RATCC)

Ground Controlled Approach (GCA) - A mobile radar approach facility consisting of an air surveillance radar, precision approach radar, communication and other related components necessary to provide radar air traffic control services at the airfield to which assigned. The GCA facility is manned by air control and maintenance personnel and designated as a numerical unit for identification purposes. The functional responsibility of the GCA unit is the control of air traffic arriving and departing from the airfield and to assist pilots in their low approach for landing during weather conditions of low visibility and ceiling. At certain locations, the air traffic controller positions may be remoted into a central control room.

Radar Air Traffic Control Center (RATCC) - A radar approach facility consisting of a fixed air surveillance radar, a mobile precision approach radar, fixed communication equipment and other related components necessary to provide terminal air traffic control services at the airfield to which assigned. The RATCC is manned by air control and maintenance personnel, and although primarily a fixed installation, it is designated as a numerical unit for identification purposes. The mission of a RATCC is to provide, on a continuous basis, the safe, orderly, and expeditious movement of air traffic; within the facility's area of control, to and from operating areas, into and from the Federal Airways System, and to assist pilots in their low approach for landing during weather conditions of low visibility and ceiling. The air traffic controller positions are remoted into a central control room located normally in the operations building.

AIR SURVEILLANCE RADAR (ASR)

AIR SURVEILLANCE RADAR (ASR) - A mobile radar approach facility consisting of an air surveillance radar, communication and other related components located at an airfield or seadrome to assist pilots by providing range and azimuth information during their approach for landing in weather conditions of reduced visibility and ceiling. The ASR facility is manned by air control and maintenance personnel and designated as a numerical unit for identification purposes. ASR facilities are not equipped to furnish altitude or glide path information and are used primarily for seadrome approaches.
