From: CNO
To: Distribution List.

Subj: Schedule of the Naval Aeronautic Organization,
Including Marine Corps.

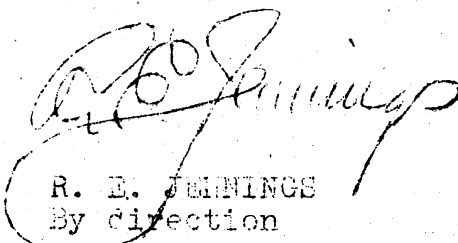

1. Presented herewith is a copy of the Schedule of the Naval Aeronautic Organization as of 10 December 1945.

2. This publication has been expanded into 3 parts: Part One presents the usual information as in previous copies, except that a section on the proposed Reserve Training Program has been added. Part Two divides the units of the Naval Aeronautic Organization into groups according to the major commands from which they receive logistic support for authorized aircraft complements. Some units not having aircraft assigned are grouped under a miscellaneous section (26). Part Three is the Table of Abbreviations.

3. Aircraft complements do not include spare allowances of any kind. Complements are designated in three different ways: (1) "Present Complements", when no post-war complement has been proposed or authorized as yet. (2) "Proposed Ultimate Complement", when a post-war complement has been proposed but has not yet been authorized. (3) "Ultimate Complement", when a definite post-war complement has been authorized.

4. The following is a list of aircraft models which are alternates for those contained in subject schedule:

OFFICE OF THE CHIEF OF NAVAL OPERATIONS

SCHEDULE OF THE NAVAL AERONAUTIC ORGANIZATION

DECLASSIFIED

ADMINISTRATIVE UNITS

Naval Air Stations, Auxiliary Air Stations, Air Facilities and Auxiliary Air Facilities are arranged alphabetically under the Naval District having cognizance over them.

The following codes are used to indicate the post war status of the activities:

- (a) Full Operation (f) - An operating condition requiring facilities and personnel adequate to support planned operations which will utilize more than half of the existing capacity of the station.
- (b) Reduced Operation (R) - An operating condition requiring facilities and personnel adequate to support planned operations which will utilize less than half of the existing capacity of the station.
- (c) Maintenance (M) - A greatly reduced operating condition requiring a minimum strength self-sustaining personnel unit, the mission of which is to support emergency and itinerant operations and to maintain the facilities and equipment in such condition that they can, by addition of personnel, be placed back in full operation with a minimum delay.
- (d) Caretaker (C) - A non-operating condition requiring a minimum strength personnel unit, the mission of which is to maintain physical U. S. possession of the property involved, and to guard such property against deterioration, damage, looting and theft.
- (e) Surplus (S) - Excess to aviation requirements of the Naval Shore Establishment. May be desired for non-aviation purposes; if not so desired, will be declared to Surplus Property Board for disposal.

The ultimate aircraft complements are listed as "proposed" complements only since official approval of each individual station's postwar aircraft complement has not yet been released. However, these complements are considered to be sufficiently firm to be used for planning purposes.

The proposed ultimate aircraft complements have been summarized by Naval Air Bases. It should be noted that these summaries are a duplication of the aircraft listed station by station; they are not in addition to the individual station complements.
