MAJOR CONTINENTAL AND EXTRA-CONTINENTAL AVIATION SHORE ACTIVITIES

The planned Naval Aviation Shore Establishment, including Marine Activities, for the Fiscal Year 1961 is reflected in the assigned missions of individual activities. These missions are based on the Basic Naval Establishment Plan for Fiscal Year 1961 and may be modified as revised SECNAV NOTICES are issued. Assigned tasks to accomplish the listed mission are promulgated by BUWEPS NOTICES (Series 5451) which supersede the OPNAV NOTICES for each activity. The "units/activities to be supported" by individual activities are designated by the Chief of Naval Operations and will be listed in the appropriate BUWEPS NOTICE 5451 and as shown herein. Permanent duty stations of Naval units are contained in the effective edition of OPNAV INSTRUCTION 3114.14.

OLF

In the following tabulation of bases and satellite fields, an Outlying Field (OLF) is an airfield having no established facilities in operation except a landing area. It is designated as such by the Chief of Naval Operations in this document for the purpose of providing a landing area whereon aircraft based at established Naval air installations can conduct landing practice or other exercises which are best conducted away from the parent installations. An OLF is under the cognizance of a nearby parent air station to which are allocated minimum funds for the maintenance of the OLF. No personnel are based at an OLF.

ALF

An Auxiliary Landing Field (ALF) is an airfield having some facilities in operation in addition to a landing area. It is designated as such by the Chief of Naval Operations for the purpose of providing an airfield at which aircraft based at established Naval air installations can be refueled and/or rearmed for the conduct of gunnery practice. The facilities which are in operation, in addition to the landing area, may include several or all of the following: minimum personnel berthing and messing facilities, air traffic control, communication, crash and rescue, refueling or rearming equipment. An ALF is not a separate established Naval activity, and therefore is not listed in the "Catalog of Naval Activities." It is under the cognizance of a nearby parent air station to which are allocated minimum personnel, funds and equipment for its support. The parent air station may maintain a small caretaker detachment at an ALF.

AIRCRAFT

Aircraft assigned to activities are planned assignments, and will reflect normal types and numbers of aircraft based on a given activity. Aircraft and unit deployments can be determined from OPNAV NOTICE P03110 (Blue Book). Aircraft assigned to O&R facilities and BUWEPS aircraft storage pools are omitted and can be found in the Blue Book.

PERSONNEL

Personnel figures for Naval, Coast Guard, and Air Force units reflect beginning FY 1961 authorized billets. Numerical allowances for Marine Corps units are based on Tables of Organization for Fleet Marine Force units, and on Tables of Organization and/or Navy Manpower Authorization Allowances for Non-Fleet Marine Force Units.

<u>Figures in parenthesis are shown for information only and are reflected in parent activity totals.</u>

Personnel data for USNR/USMCR Squadrons/Units represent numbers allowed in drill pay status. Active duty personnel (TARS and USN) associated with Reserve activities are shown separately.

Training Load: Approximately 6,500 reserve pilots will utilize these facilities during regularly scheduled drills and active duty for training. The drill programs of the Naval Air Reserve are divided into two groups in terms of the number of drills authorized annually in a pay status: the 48-drill, the 24-drill programs. Programs of the Marine Air Reserve are divided into TWO GROUPS: the 48-drill and the 24-drill programs. All personnel attached to the drill pay units are in the READY RESERVE, personnel may be ordered to active duty either in time of war, in time of national emergency declared by the Congress or proclaimed by the President, or when otherwise authorized by law.

- a. The 48-drill program is composed of combat and combat support type squadrons in addition to administrative Air Wing Staffs. These squadrons are organized and trained to conform in composition and mission with their regular Navy and Marine counterparts. They attend 48-drills per year in addition to an annual 14 day active duty training period.

APPROACH SYSTEMS

GROUND CONTROLLED APPROACH UNITS

Ground Controlled Approach (GCA) is a radar talk down system providing range, azimuth and elevation information to enable a controller to assist a pilot to a landing under weather conditions approaching zero visibility and ceiling. Radar Air Traffic Control Centers (RATCC) are to insure the "round the clock" assistance to air movement of aircraft to and from federal airways, off airways, seaward operating areas, and around naval air activities.
