#### MAJOR CONTINENTAL AND EXTRA-CONTINENTAL AVIATION SHORE ACTIVITIES

The planned Naval Aviation Shore Establishment, including Marine Activities, for the Fiscal Year 1964 is reflected in the assigned missions of individual activities. These missions are based on the Basic Naval Establishment Plan for Fiscal Year 1964 and may be modified as revised SECNAV NOTICES are issued. Assigned tasks to accomplish the listed mission are promulgated by BUWEPS NOTICES (Series 5451) which supersede the OPNAV NOTICES for each activity. The "units/activities to be supported" by individual activities are designated by the Chief of Naval Operations and will be listed in the appropriate BUWEPS NOTICE 5451 and as shown herein. Permanent duty stations of Naval units are contained in the effective edition of OPNAV INSTRUCTION 3114.14.

### NAVAL AIR BASES COMMAND

Under the Commandant of a Naval District, comprises, in general, Naval and Marine Corps aviation shore activities which furnish facilities for the operation of aircraft. There are exceptions however. Marine Corps aviation activities in the Fifth and Eleventh Naval Districts generally fall under Marine Corps Air Bases Command, Eastern or Western area as appropriate. Training (including NART) stations are under the military command of the Chief of one of the various Air Training Commands.

#### NAVAL AIR STATION

An independent activity that provides aircraft operating, maintenance, training, and personnel facilities in accordance with organizational requirements.

### NAVAL AUXILIARY AIR STATION

An air installation that offers facilities similar to those provided by an air station and assists a parent air station in accordance with organizational requirements.

### NAVAL STATION

A shore activity capable of performing general functions, usually in direct support of the operating forces.

#### MARINE CORPS AIR STATION

An independent aviation activity developed to provide permanent facilities for a war strength Marine Aircraft Wing and station forces, less the units deployed at subordinate Marine Corps Air Facilities and any Marine Corps Auxiliary Landing Field. A Marine Corps Air Station possesses facilities for maintenance work beyond the scope of the capabilities of the dependent fields. It acts as the supply stock point as designated for the subordinate airfields and air facilities to be supported and budgets and manages the funds for maintenance and operations for all assigned subordinate airfields and is under the military command of the appropriate Commander, Naval Air Bases, or Commander, Marine Corps Air Bases.

### NAVAL AIR FACILITY

An activity established to meet some special requirement of naval aviation. It may or may not be administratively dependent on a parent (air or nonair) activity, in accordance with organizational requirements.

#### MAJOR CONTINENTAL AND EXTRA-CONTINENTAL AVIATION SHORE ACTIVITIES

### **AUXILIARY LANDING FIELD**

Billipides .

An airfield having limited facilities, additional to the landing area in operation. It is designated as such by the Chief of Naval Operations to provide an airfield which can serve as: a staging base for gunnery, ordnance, or other training exercises; a mirror or other landing practice site; an emergency or "Bingo" field in support of off-shore carrier operations, and/or a base, with limited support, for assigned aircraft or units. The facilities and/or services may include any or all of the following as appropriate to usage and/or user requirements: air traffic control, communications, fire and crash rescue services, personnel berthing and messing, refueling and rearming equipment, ready issue stowage, line operations, line maintenance, high usage line maintenance spare parts and limited support of assigned aircraft or units. An ALF is not a separately established activity but is under the cognizance of a nearby parent air station from which personnel, materiel and funds for its support are allocated. The parent air station may maintain a caretaker detachment and/or service unit at the ALF for day-to-day operations.

### OUTLYING FIELD (HELICOPTER OUTLYING FIELD (H)OLF)

An airfield having no established facilities in operation except a landing area. It is designated as such by the Chief of Naval Operations to provide a landing area on which aircraft based elsewhere can conduct landing practice or other exercises. An OLF is not a separately established activity but is under the cognizance of a nearby parent air station from which personnel, materiel and funds for its support are allocated. No personnel are permanently based at an OLF. However, required air traffic control and/or crash rescue personnel, or others appropriate to support the operations to be conducted, along with mobile facilities as required to supplement existing facilities, may be located at the OLF either on a "duration of the operation" or a "normal operating hours" basis.

#### STATUS

#### ACTIVE

An operating condition requiring facilities and personnel adequate to support planned operations to maintain equipment in an operating condition.

### **MAINTENANCE**

A greatly reduced operating condition requiring minimum facilities and personnel to support emergency and itinerant operations; and to maintain equipment in an operating or preserved condition such that by addition of personnel "Active" status will result.

### INACTIVE

Class A

A non-operating condition requiring physical protection of the property, personnel necessary for fire protection and periodical inspections by local representatives of management bureaus to insure that defects which would lead to accelerated deterioration are promptly corrected in accordance with accepted practices for economical static maintenance.

### PARTIAL MAINTENANCE

A condition less than "Maintenance" requiring minimum personnel for security and fire protection plus the maintenance in an operable or preserved condition of those minimum facilities and utilities determined essential to permit occasional use by operating units when and if required. The additional supporting personnel and equipment required during such periods of use will be provided by the operating force concerned.

### **O&R CLASSIFICATION**

Facilities are required for complete overhaul, repair, modification and test of aircraft, aircraft engines and all classes of aeronautical material.

### MAJOR CONTINENTAL AND EXTRA-CONTINENTAL AVIATION SHORE ACTIVITIES

Class B Facilities are required for complete overhaul, repair, modification and test of

aircraft engines and accessories, but only for essential repairs to aircraft. Aircraft will not be overhauled in these departments. Instrument overhaul

facilities will be provided only when directed by BUWEPS.

Class C Facilities are required for Maintenance only of aircraft and aircraft engines.

Class D Facilities as required for operation only of aircraft.

### **AIRCRAFT**

Aircraft assigned to activities are planned assignments, and will reflect normal types and numbers of aircraft based on a given activity. Aircraft and unit deployments can be determined from OPNAV NOTICE P03110 (Blue Book). Aircraft assigned to O&R facilities and BUWEPS aircraft storage pools are omitted and can be found in the Blue Book.

#### PERSONNEL

Tables at the beginning of this publication include a summary of the personnel allocations for aviation activities as of 30 June 1963. Personnel figures shown for the individual stations and activities reflect an estimated on board count as of 1 July 1964. Estimates are prepared within a month or two of the 1 July date.

Figures in parenthesis are shown for information only and are reflected in parent activity totals.

Personnel data for USNR/USMCR squadrons/units represent numbers allowed in drill pay status. Active duty personnel (TARS and USN) associated with Reserve activities are shown separately.

### MANAGEMENT CONTROL

The exercise of executive authority and responsibility for the performance of the mission, tasks, and work of shore activities. This responsibility includes mission planning, shore activity development and work load planning, internal organization and procedures, budgeting, accounting, staffing, and the utilization of personnel, funds, materials and facilities. Military command includes also matters related to defense, and under conditions of emergency or disaster, when normal exercise of management control is impractical, shall include the power and duty to exercise authoratative direction as circumstances may require. The function of inspection and the responsibility for appropriate coordination are inherent in military command. (General Order 19, 21 May 1959)

#### APPROACH SYSTEMS

#### GROUND CONTROLLED APPROACH UNITS

Ground Controlled Approach (GCA) is a radar talk down system providing range, azimuth and elevation information to enable a controller to assist a pilot to a landing under weather conditions approaching zero visibility and ceiling. Radar Air Traffic Control Centers (RATCC) are to insure the "round the clock" assistance to air movement of aircraft to and from federal airways, off airways, seaward operating areas, and around naval air activities.

#### MARINE AIR TRAFFIC CONTROL UNITS

A Marine Air Traffic Control Unit is a fleet unit designed to provide air traffic control for advance bases. It is an integral part of a Marine Air Base Squadron and contains homing facilities, surveillance radar, GCA, mobile TACAN, a portable control tower, and the necessary communication equipment to provide complete terminal air traffic control. At present there are nine active MATCU's; six in FMFPAC and three in FMFLANT.
