STATION LISTING FORMAT

The below example covers the majority of units/activities which may be aboard a base or station of the naval aeronautical shore establishment. Not all categories are applicable and station commanders need only list those categories, which pertain. Use on board counts. Unique situations affecting base support requirements may be listed at the station commander's discretion. For the purposes of these reports, "naval activities" denote both Navy and USMC units. When changes are minor in nature, it is requested that the updated report be carefully and legibly updated by pen and ink changes. SUBMISSION OF THE 1 OCTOBER 1998 UPDATES TO THIS DOCUMENT WILL CONFORM TO THE FORMAT OF THE EXAMPLE STATION LISTING SET FORTH BELOW.

NOTE 1/ Where a subordinate unit and its parent unit are listed aboard the same station, each unit (subordinate or parent) will report only personnel assigned to its respective unite.

NOTE 2/ In any category, if an activity conducts student training, under that category state the average number of students by type (officer/enlisted) and service (USN/R or USMC/R).

DEFINITION OF TERMS AND AIDS TO UNDERSTANDING THIS BOOK

The planned Naval Aviation Shore Establishment, including Marine activities, for 1 October 1998 is reflected in the assigned missions of individual activities. These missions are promulgated and revised by the OPNAV Notice 5400 series. As directed by OPNAV Instruction 5450.171, it is the responsibility of Echelon 2 Commanders to promulgate functions and tasks for each activity under their command in support of the assigned mission. NAVAIR Instruction series 5451 contains a list of approved tasks for each activity under Naval Air Systems Command. Permanent duty stations of naval units are contained in the effective edition of OPNAV Instruction 3111.14.

AIRCRAFT ON BOARD STATIONS

Base aircraft data contained in this Notice reflect an on board (including home base deployed) count as of the date of the covering letter 1 October. On board estimates are submitted by air stations and facilities a month or two in advance.

NAVY MANPOWER ALLOCATION

Tables on pages 5-10 of this publication include a Fiscal 1998 summary of the personnel allocations for aviation activities as of 1 October 1998. Personnel figures shown for the individual stations and activities reflect an estimated on board count as of 1 October 1998. Estimates are prepared within a month or two of the 1 October date.

Personnel data for USNR/USMCR squadrons/units represent numbers allowed in drill pay status. Active duty personnel (TARS and USN) associated with Reserve activities are shown separately.

COMMAND OVER SHORE ACTIVITIES

The exercise of command over a shore (field) activity has as its primary purpose the provision of effective support to the forces of the United States Navy and of the United States Marine Corps. It encompasses over-all authority, direction, control, and coordination necessary to carry out the assigned mission, and responsibility for the operating efficiency of the activity. It includes authority and responsibility for mission planning, shore activity planning and workload planning. It also includes authority and responsibility for coordinating the application of the various elements of support. Mission and facilities planning for shore (field) activities shall be accomplished with the guidance and assistance of commands, bureaus and offices assigned support responsibilities, and with the technical advice of other commands, bureaus and offices. Administrative and technical guidance shall include:

- a. The establishment of standards and procedures for specialized administrative or technical functions:
- b. Professional and technical advice, guidance, and assistance;
- c. Performance of specialized administrative or technical functions as a service.

Supervision by Staff Assistants over assigned shore (field) activities encompasses the same degree of authority and responsibility as command.
(SECNAVINST 5400.14A)

DEFINITION OF TERMS AND AIDS TO UNDERSTANDING THIS BOOK (Continued)

TECHNICAL SUPPORT TO COMMANDS AND ACTIVITIES

Technical support is a term denoting the responsibility of various systems commands, bureaus and offices within the Navy to provide resources to a command or activity of the Navy or Marine Corps to enable it to carry out its mission. It includes administrative, personnel and material support, guidance and assistance in and evaluation of such matters as organization, procedures, budgeting, accounting, staffing and the utilization of personnel funds, material and facilities. In addition, technical support includes the responsibility to assist command in evaluating the operating efficiency of activities.
(SECNAVINST 5400.14A)

TYPES OF NAVAL AIR STATIONS

NAVAL AIR STATION

An independent activity that provides aircraft operating, maintenance, training and personnel facilities in accordance with organization requirements.

NAVAL STATION

A shore activity capable of performing general functions, usually in direct support of the operating forces.

MARINE CORPS AIR STATION

An independent aviation activity developed to provide permanent facilities for a war strength Marine Aircraft Wing and station forces, less the units deployed at subordinate Marine Corps Air Facilities and any Marine Corps Auxiliary Landing Field. A Marine Corps Air Station possesses facilities for maintenance work beyond the scope of the capabilities of the dependent fields. It acts as the supply stock point as designated for the subordinate airfields and air facilities to be supported and budgets and manages the funds for maintenance and operations for all assigned subordinate airfields and is under the command of the appropriate Commander, Marine Corps Air Bases.

NAVAL AIR FACILITY

An activity established to meet some special requirement of naval aviation. It may or may not be administratively dependent on a parent (air or non-air) activity, in accordance with organizational requirements.

AUXILIARY LANDING FIELD

An airfield having limited facilities, additional to the landing area in operation. It is designated as such by the Chief of Naval Operations to provide an airfield which can serve as: a staging base for gunnery, ordnance, or other training exercises; a mirror or other landing practice site; or emergency or "Bingo" field in support of off-shore carrier operations, and/or a base, with limited support, for assigned aircraft or units. The facilities and/or services may include any or all of the following as appropriate to usage and/or user requirements: air traffic control, communications, fire and crash rescue services, personnel berthing and messing, refueling and rearming equipment, read issue stowage, line operations, lime maintenance, high usage line maintenance spare parts and limited support of assigned aircraft or units. An ALF is not a separately established activity but is under the cognizance of a nearby parent (air or non-air) activity from which personnel, material and funds for its support are allocated. The parent activity may maintain a caretaker detachment and/or service unit at the ALF for day-to-day operations.

DEFINITION OF TERMS AND AIDS TO UNDERSTANDING THIS BOOK (Continued)

OUTLYING LANDING FIELD (HELICOPTER OUTLYING LANDING FIELD (H) OLF)

An airfield having no established facilities in operation except a landing area. It is designated as such by the Chief of Naval Operations to provide a landing area on which aircraft based elsewhere can conduct landing practice or other exercises. An OLF is not a separately established activity but is under the cognizance of a nearby parent air station from which personnel, material and funds for its support are allocated. No personnel are permanently based at an OLF. However, required air traffic control and/or crash rescue personnel, or others appropriate to support the operations to be conducted, along with mobile facilities as required to supplement existing facilities, may be located at the OLF either on a "duration of the operation" or a "normal operating hours" basis.

THE STATUS OF NAVAL AIR ACTIVITIES

SOURCE: OPNAVINST 5450.169D 20 Apr 1982

ACTIVE

Development. A non-operating condition during the constriction of preparation period.

Fully Operational. Adequate personnel and facilities to support the assigned mission and planned operations.

Maintenance. Minimum personnel and facilities to support emergency or intermittent operations and maintenance of equipment in an operating or preserved condition. Additional personnel will achieve fully operational status.

Partial Maintenance. Minimum personnel for security, fire protection and maintenance. Maintains minimum facilities and utilities essential for occasional use by operating forces in an operable or preserved condition. Operating units provide additional personnel and equipment necessary during such use.

INACTIVE

Mobilization. This designation identifies real property of a non-operating shore activity retained for mobilization purposes. The major claimant who establishes the requirement for the "mobilization" designation is responsible for physical security, fire protection, and static maintenance (timely correction of defects conducive to accelerated deterioration).

Excess. This designation identifies real property of a shore activity being processed as excess to the needs of the Navy. The major claimant to whom the "excess" shore activity was assigned when active is responsible for physical security, fire protection and static maintenance until final disposal of the real property. The major claimant is also required to advise the CNO N09B22F of final disposal of the real property. CNO N09B22F will then modify Section 4 of the SNDL CAT.

NAVY MANPOWER AUTHORIZATIONS

The total Military Manpower Authorizations, excluding USMC, for Fiscal Year 1998 requires end year strength of 424,179. This includes all Regulars and most Reserve on continuous active duty and all officer candidates. It also includes personnel with other government agencies in a reimbursable status.

Program: II. Professional Services (Continued)

The Command also performs annual and special examinations for retirement, separation, discharge, reenlistment, post-hospitalization, post-Medical Board, and fitness to continue flying of other aviation military personnel stationed at NAS Pensacola and as required by the Bureau of Medicine and Surgery regulations or as directed by higher authority. In addition, the Command provides the following special services: performs annual aviation physical examinations for Army Reserve and Air Force Reserve aviation personnel, Coast Guard and Foreign Flight Students stationed in the surrounding area and provides professional and clerical assistant necessary to process cases referred to the Special Board of Flight Surgeons. Finally, this Command maintains the Aerospace Advisory Council, a focus of aeromedically trained, operationally experience, clinical specialists for consultative support and review of programs, problems, and instructions in matters of Aerospace medicine to higher authority.

Program: III. Aerospace Physical Qualifications Directorate. This directorate is responsible for review of all applicants for all aviation programs for both navy and Marine Corps personnel. In the case of personnel who are determined to be not physically qualified for flight duties, the directorate makes waiver recommendations to the Bureau Naval Personnel, Commandant of the Marine Corps or the Navy Recruiting Command as appropriate. Close liaison is maintained with the Office of the Chief of Naval Operations; Chief, Bureau Naval Personnel; The Commandant of the Marine Corps and the Commander, Navy Recruiting Command in matters relative to the physical qualification of aviation personnel. Microfilm records are maintained on all aviation designate personnel as well as all applicants to aviation programs, The directorate is also responsible for the maintenance and updating of the aviation medicine research computer database. Telephone and written consultative support is provided to aviation medicine practitioners world wide.

Program: IV. Repatriated Prisoner of War Program. On 1 October 1980, with the decommissioning of the Center for Prisoners of War Study, the Command assumed responsibility for the follow-up of former Navy and Marine Corps Vietnam Prisoners of War. This ongoing program monitors the long-term fitness and health of these men and is accumulating data for scientific analysis. The NOMI program is also unique in the 138 of the 186 naval Aviators has a matched comparison group partner who was not a Prisoner of War. In January 1994, the Air Force funded their Vietnam RPOWS to come to NOMI to participate in the 20th year of repatriation follow-up. In August 1997, the Army began funding their Vietnam RPOWS to participate in the follow-up study. This brings the number of participants in the follow-up study to almost 600. Participants receive a comprehensive physical examination and psychiatric screening and are referred for follow-up care as appropriate.

Program: V. Iranian Hostage Program. In September 1981, the Command assumed responsibility for follow-up examinations of U.S. Personnel taken hostage when the U.S. Embassy was overrun. The follow-up study is conducted in the same format as the Prisoner of War follow-up and is intended to evaluate the long-term effects of captivity and torture on health and longevity.

Program: VI. Desert Storm Prisoner of War Program. In March 1991, the Command participated in planning and execution of the medical repatriation process of 21 U.S. Servicemen held as prisoners in Iraq. These personnel have been in the POW follow-up study and will be evaluated appropriately.

Overseeing advanced medical programs such as telemedicine, computerized translation and medical modeling. Additionally, providing limited direct medical support for local dive teams and other operational units.

Program: VIII. Naval Aviation Survival Training Program Model Manager Director. The directorate mission of "THE LIFESAVERS" is to prevent U.S. loss of life in the Department of Defense operational environment. To accomplish this goal the primary focus is two fold, first to eliminate losses due to mishaps and hostilities, and secondly to ensure survival of mishaps and hostilities if they do occur. The Commanding officer is designated as the naval Aviation Survival Training Program (NASTP) Model Manager by the Chief of Naval Operations and Chief, Bureau of Medicine and Surgery (BUMED), this Directorate is tasked with carrying out the Model Manager responsibilities. The Model Manager provides a central point of expertise for the NASTP, and acts primarily as the implementation arm and advisor to the NASTP Training Agent (BUMED). Specifically, this Directorate is responsible for development of all curricula used to support NASTP, standardization of training and ensuring student and staff safety in this High Risk training environment. This involves 30 separate curricula, which trains over 45,000 students annually. The directorate is divided into five departments: 1) Aviation Physiology Curricula 2) Aviation Water Survival Curricula 3) Safety and Standardization 4) Training Device/Quality Assurance and Department Revalidation and 5) Special Support Services, Command Graphics.

On 1 October 1996, 12 Aviation Survival Training Centers (ASTCs) were added to the command with an additional 226 personnel. On 17 December 1996, per OPNAV Notice 5450, the name of the Naval Aerospace and Operational Medical Institute (NAOMI) was changed to Naval Operational Medicine Institute (NOMI).

NAVAL AEROSPACE MEDICAL RESEARCH LABORATORY

NAVAL AEROSPACE MEDICAL RESEARCH LABORATORY

Location: Naval Aerospace Medical Research Laboratory (NAMRL) is located on Naval Air Station, Pensacola, Florida, and is a component of the Naval Health Research Center, San Diego, California.

Mission: The laboratory's mission is to conduct research and development in aviation medicine and allied sciences to enhance the health, safety, and readiness of Navy and Marine Corps personnel.

Program: I. Research. The Laboratory's programs emphasize research in biomedical systems and standards, spatial orientation, aviation selection, operational medicine, and aviation medicine. State-of-the-art facilities support auditory, visual, vestibular, cognitive, and psychopharmacological research. We also operate three mobile field laboratories, the world's finest collection of man-rated acceleration research devices, and an innovative technology-transfer program. Our scientific expertise has supported fleet operations, aircrew selection, mission safety and effectiveness, and aircraft design for over five decades and has led to the publication of over 2000 scientific articles. A major focus is the definition and elimination of health hazards (including motion, noise, fatigue, sensory restriction, and thermal effects) in operational environments. Improved design specification for aircraft, weapon systems, and protective systems represent another major product line. Our research efforts are enhanced by a large local population of aviation trainees from the Chief of Naval Education and Training, Chief of Naval Air Training, and Marine Aviation Training Support Group, who serve as volunteer subjects.

II. Special projects. The Laboratory interacts with and provides consultative services to other Department of Defense (DOD) facilities, the Department of Transportation, the National Aeronautics and Space Administration, and other governmental agencies. The Laboratory is a member of the Triservice Aeromedical Research Panel, the Federal Laboratory Consortium, the Interlaboratory Committee on Editing and Publishing, the Scientific and Technical Information Program, and the Gulf Coast Alliance for Technology Transfer. Other affiliations include the NATO Advisory Group Aerospace Research and Development, the Air Standardization Coordinating Committee Working Party 61, the DoD Human Factors Engineering Technical Group, and the Military Testing Association, among others. Current projects focus on end products such as specialized devices for training visual scan patterns in aviators, vestibular performance test batteries for aviators, improved acoustic protective devices, computerized aviation-selection test batteries, a Tactile Situational Awareness System (vibrotactile aviation and underwater orientation vest), an Automated Pilot Examination System, a primary flight instrument display, a digital anthropometric measuring device, and training kits for night vision. Other areas currently under investigation include spatial orientation, motion sickness (sopite syndrome, simulator sickness), virtual environments, health risk assessment, and aviation accident modeling. Data collection in operational environments is augmented by three mobile field laboratories: a night-vision laboratory, which also functions as a mobile night-vision training classroom; a spatial orientation trailer, which has been deployed to investigate human responses to visually and motion-induced vestibular stimuli in operational settings; and an aviation medicine trailer, which has been deployed to support research into aviation anthropometrics, biomechanics, and occupational-strength standards.

NAVAL METEOROLOGY AND OCEANOGRAPHY COMMAND

1. Commander, Naval Meteorology and Oceanography Command

Mission: Provides the command and management of assigned Oceanographic (meteorology, oceanography (METOC) and Geospatial Information and Services (GIS)) activities and efforts under the Operational Naval Oceanography Program, providing support and technical guidance throughout the Department of the Navy and the Department of Defense.

The Commander directs an organization providing METOC and GIS products and services to optimize warfighting resources, support safe operations and enhance dominance of the battlespace through superior understanding and exploitation of the natural environment. The organizational structure to provide those products and services is as follows:

2. Fleet Numerical Meteorology and Oceanography Center (Command - COMNAVMETOCOM)

Mission: To provide operational numerical meteorology and oceanography (METOC) products and services to naval forces and the Department of Defense; and to develop and test numerical techniques to enhance METOC and analytical and forecasting capabilities as directed by COMNAVMETOCOM.

The Fleet Numerical Meteorology and Oceanography Center (FLENUMMETOCEN) in Monterey, CA is the Naval Meteorology and Oceanography Command's processing center dedicated to running the Department of Defense global meteorological model, as well as operational high resolution regional atmospheric and oceanographic analysis and forecast models. Through linkage with DoD and NOAA environmental satellite data distribution systems, FLENUMMETOCEN acquires global coverage of environmental data. Numerically generated METOC products are made available for distribution on Navy and joint command, control, communications, computers and intelligence (C4I) systems. The Navy Oceanographic Data Distribution System (NODDS) permits worldwide, dial-in access to FLENUMMETOCEN products. The Joint METOC Viewer (JMV) allows access to METOC products thru the internet. FLENUMMETOCEN is uniquely capable of providing high resolution meteorological products on short notice, for any location, worldwide, in support of contingency military and humanitarian operations. Products available from FLENUMMETOCEN include atmospheric and oceanographic observations data extracts, and analysis and forecast fields of METOC parameters required to support joint military operations. FLENUMMETOCEN models are a critical segment of national and DoD WMD dispersion prediction activities.

NAVAL METEOROLOGY AND OCEANOGRAPHY COMMAND

3. Naval Oceanographic Office (Command - COMNAVMETOCCOM)

Mission: To conduct multidisciplinary ocean surveys; to collect and analyze all-source oceanographic data; and to generate operationally significant strategic and tactical products and services which address U.S. Navy and DoD oceanographic needs for effective weapon and sensor system performance and safe, accurate navigation.

The Naval Oceanographic Office (NAVOCEANO), Stennis Space Center, MS is a field activity of the Commander, Naval Meteorology and Oceanography Command. NAVOCEANO is responsible for collecting, processing, storing, and distributing hydrographic, oceanographic and other geophysical data and derived products. This office responds to long-term national and strategic requirements and emergent, short-term requirements in support of contingency operations. NAVOCEANO's mission is carried out with a fleet of survey ships, a sophisticated satellite and ocean buoy data processing facility, geophysical survey aircraft, and a significant number of international data collection and exchange agreements. Technology advances such as airborne lidar bathymetry systems and underwater autonomous vehicles are continuously incorporated to augment collection assets. NAVOCEANO's Warfighting Support Center leverages the Office's ocean experts, vast repository of oceanographic survey data, national expertise in satellite remote sensing and imagery analysis and an ability to rapidly relocate ocean models to serve as an all-source oceanographic data fusion center for the warfighter. Resultant products are disseminated to naval forces to describe the littoral and blue water battlespace environment. For better customer support NAVOCEANO stations fleet liaison personnel in theater to more effectively identify needs for product tailoring and delivery. With designated training responsibility NAVO ensures that METOC personnel are properly prepared to meet fleet environmental needs armed with the latest and most up to date knowledge of sensors and forecasting techniques. NAVOCEANO also hosts and exploits the DoD Major Shared Resource Center supercomputer complex, a significant research tool for Navy, DoD, and university scientists.

4. Naval (Regional) Meteorology and Oceanography Centers (Command - COMNAVMETOCCOM)

Mission: To provide, within areas of responsibility, METOC products and services to the Armed Forces of the Department of the Defense as assigned by COMNAVMETOCCOM.

SOURCE: COMNAVMETOCCOM

NAVAL METEOROLOGY AND OCEANOGRAPHY COMMAND

4. Naval (Regional) Meteorology and Oceanography Centers (Command - COMNAVMETOCCOM) (Continued)

The six regional Navy Meteorology and Oceanography Centers are hubs for the dissemination of METOC data; located in Fleet concentration areas, they provide full spectrum meteorological and oceanographic services to Navy and joint forces operating within their respective area of responsibility.

- a. The Naval Pacific Meteorology and Oceanography Center (NAVPACMETOCCEN) Pearl Harbor, HI is responsible for the Mid Pacific area and provides support to CINCPACFLT. NAVPACMETOCCEN Pearl Harbor operates the Joint Typhoon Warning Center with the U.S. Air Force to provide tropical cyclone warnings to DoD and U.S. interest in the Western Pacific and Indian Oceans.
- b. NAVPACMETOCCEN San Diego is responsible for the East Pacific and supports COMTHIRDFLT.
- c. NAVPACMETOCCEN Yokoska is responsible for the West Pacific and Indian Ocean and supports COMSEVENTHFLT.
- d. The Naval Central Meteorology and Oceanography Center (NAVCENTMETOCCEN) is responsible for the Northern Indian Ocean, Red Sea, and Arabian Gulf areas and supports CENTCOM / COMFIFTHFLT.
- e. The Naval Atlantic Meteorology and Oceanography Center, Norfolk, VA (NAVLANTMETOCCEN) is responsible for the Atlantic Ocean, and the Greenland, Norwegian, and Barents Seas and supports CINCLANTFLT / COMSECONDFLT.
- f. The Naval European Meteorology and Oceanography Center, Rota, Spain (NAVEURMETOCCEN) is responsible for the Mediterranean, Black and Baltic Seas and supports CINCUSNAVEUR / COMSIXTHFLT Fleet.

Familiar with operations within theater, regional METOC centers manage and prioritize the dissemination of basic numerical METOC products from FLENUMMETOCCEN and NAVOCEANO, as well as other national and international sources, and add tailored services specifically focused on theater requirements. METOC services, data, and products are disseminated to the fleet via a wide range of U.S. military and commercial communication paths. Unclassified exchanges ashore and with large deck ships is accomplished via DoD's Non-secure Internet Protocol Router Network (NIPRNET) which also provides access to the INTERNET. Classified exchange ashore and with large deck ships is accomplished via DoD's Secure Internet Protocol Router Network (SIPRNET). The Joint World Wide Intelligence Communications Systems (JWICS) provides Secure Compartmented Information exchange with intelligence activities.

NAVAL METEOROLOGY AND OCEANOGRAPHY COMMAND

4. Naval (Regional) Meteorology and Oceanography Centers (Command - COMNAVMETOCCOM) (Continued)

The Regional Centers provide global and high-resolution theater analysis and forecast fields of METOC parameters required for shipboard and other deployed mobile METOC processing systems. Products and services include depiction of significant weather, tropical cyclone advisories, high winds and seas warnings, ship route weather forecasts and routing, aviation forecasts and routing, and a variety of special meteorological and oceanographic forecasts produced as needed to meet the situational requirements of the Navy and Joint Force Commander. In addition, these centers act as staging centers for the Navy Mobile Environmental Team, (MET), teams of military METOC personnel which embark aboard fleet units deployed around the world to provide environmental support and interpret METOC products for on-scene warfighters. Because of their theater presence and focus, NAVMETOCCOM centers are ideally suited to serve as Joint METOC Forecasts Units (JMFU) in support of theater joint operations.

5. Naval Atlantic Meteorology and Oceanography Facility Jacksonville: (Command - NAVLANTMETOCCEN)
Naval Pacific Meteorology and Oceanography Facility Whidbey Island: (Command - NAVPACMETOCCEN San Diego)
Naval Training Meteorology and Oceanography Facility Pensacola: (Command - NAVLANTMETOCCEN)
Naval Ice Center: (Command - NAVOCEANO)

Mission: To provide, within area of responsibility, METOC products and services to the Armed Forces of the Department of Defense as assigned by COMNAVMETOCCOM.

The Naval Meteorology and Oceanography Command Facilities at Jacksonville, FL and Whidbey Island, WA provide limited area, local and aviation environmental forecast services, as well as services to aircraft, ship and submarine staffs. Meteorological forecast guidance from the regional oceanography centers and the Fleet Numerical Meteorology and Oceanography Center is used by all facilities. Those facilities located overseas augment this guidance with data from local sources. The Naval Training Meteorology and Oceanography Facility at Pensacola, FL provides a direct link to CNET for fleet METOC training issues in addition to full-time METOC support for the local area. The Naval Ice Center, Suitland, MD in cooperation with NOAA and the U.S. Coast Guard provides ice analysis and forecasting services to Department of Defense and allied activities either directly or through the regional NAVMETOCCOM centers.

NAVLANTMETOCFAC / NAVTRAMETOCFAC)

Mission: To provide, within local/functional areas of responsibility, METOC products and services as assigned by COMNAVMETOCCOM.

The Naval Meteorology and Oceanography Command Detachments are located worldwide. Although primarily situated at Naval Air Stations, several are located at Naval Stations in support of seagoing units. Each detachment is established under an Officer or Chief Petty Officer in Charge, who reports to one of the Naval Meteorology and Oceanography regional centers or facilities. The detachments provide meteorological and oceanographic forecasting and warning services to Department of Defense and allied units within their local and functional areas of responsibility. Detachments within the contiguous states use the basic and applied meteorological numerical products from both the Fleet Numerical Meteorology and Oceanography Center and the National Meteorological Center in providing services. Overseas detachments use available foreign products in addition to Fleet Numerical Meteorology and Oceanography Center numerical products. Two detachments are oriented to provide specific technical services; one coordinates the Navy's climatological program, which is an element of the Federal Climate Complex at the National Climatic Data Center, Asheville, NC the other involves circuit management of the Automated Weather Network (AWN) at Tinker, AFB, OK.
