#### V. NARRATIVE OF VR-6 HISTORY FROM 1 MARCH 1949 TO 31 MARCH 1949

Lieutenant (jg) Leo M. "Smokey" SABOTA of VR-6 became the first Navy pilot to complete 100 round trips to Tempelhof at 2233 on 4 March 1949. "Smokey" flew his first mission to Berlin on 24 November 1948 when the Squadron started operating with the Air Lift and just 100 days later he topped the century mark. Close behind him was Lieutenant (jg) Phillip R. SIMMONS, who flew his 100th mission on 13 March. Third to complete 100 missions was Lieutenant Herbert E. BAILEY, USN, who flew his final trip on 15 March. He had the distinction of completing this number without an engine failure. All were recommended for the Air Medal.

On 10 March Lieutenant (jg) Wayne L. BROOKS, plane commander, Lieutenant (jg) Loren L. FLOREY, co-pilot, and AD3 Bernard N. CARLOCK, flight mechanic, were practically stampeded by the unloading crew at Tempelhof as they disembarked from the plane for a snack at the chow wagon. Suspecting something unusual, BROOKS asked what the reason was for so much hustle. He was told the crew was attempting to establish a new unloading record, and they did so by clearing the aircraft in six minutes flat. Just twenty-seven minutes elapsed between landing and take-off, and this was close to a record in spite of the fact that the VR-6 aircraft had to wait upon several others at the end of the runway.

Twelve officers were detached from the Squadron on 16 March, thereby initiating the rotation program. They were Lieutenant Herman P. BUERGHEY, Lieutenant Vernon L. BROWN, Lieutenant Herbert E. BAILEY, Lieutenant Alfred D. RUSK, Lieutenant (jg) James G. ZOWARKA, Lieutenant (jg) Wallace J. JOHNSON, Ensign Alfred N. CAVE, Ensign Richard S. JACKSON, Ensign Harry W. KRUEGER, Ensign Reynald V. KEIM, and Ensign L. REINHARD.<sup>1</sup>

Lieutenant Doron M. WARREN, USN, was named Squadron Personnel Officer on 20 March, relieving Lieutenant Robert G. "Judge" WISSMAN, who returned to the States for duty with VR-1.

On 24 March Ensigns John L. ZENT, Richard D. MURRAY, and Glenn E. TREWET were notified that they had been recommended by the Selection Board, convened by the Secretary of the Navy, for permanent appointment in the U.S. Navy as commissioned officers.

About midnight on the night of 31 March Commander BADGER, Squadron Skipper, was preparing to depart on his second hop to Berlin when ADC Thomas H. FLOWERS, assistant operations officer, remarked, "Captain, you are grounded for flight time this month!" Commander BADGER replied, "What, I haven't flown that much!" A quick check of his log book revealed that he had 98.3 hours up to that moment in 28 trips. Since the hop he was preparing to fly would go in the April record, squadron operations decided that he could fly that night.

<sup>1</sup>Squadron Orders dated 16 March 1949.

March was another record month for Air Transport Squadron SIX in its operations with the Air Lift. Squadron records in efficiency, total trips, total tons, hours flown and utilization all were broken. The Squadron percent of accomplishment or efficiency figure was computed to be 135.5 percent, second only to VR-8 in the entire Air Lift Task Force. For March this figure was determined by comparing actual trips flown with those the Squadron was expected to fly with its assigned aircraft. After making allowances for weather and maintenance, CALTF had determined that the quota should be 2.12 trips per day per assigned aircraft. The Squadron figure was 2.87 trips.

In establishing this excellent showing VR-6 flew 901 sorties to the blockaded city carrying a total of 9,161 tons. The Squadron flight time for the month was 3234 hours or 500 hours above the previous high in January.<sup>1</sup>
